Policy information that people should know but often miss in the Checkout Agreement:

**How many weeks in advance can you reserve equipment?:**
- Sophomores - two weeks.
- Juniors - three weeks.
- Seniors - four weeks.
- 1st Year Graduate - two weeks
- 2nd Year Graduate - four weeks
- 3rd Year + Graduate - three weeks

**Equipment Quantity Limits:**
- C-Stands: 6
- Arri Lighting Kits: 2 (one of each... Type 1 or 2 and Mini or Max)
- Kinos: 2
- Track(Straight/Curved): 3/2
- Scoops/Broads: 2 Total
- Extension Kits: 2
- C-Clamp Totas: 1
- Flag Kits: 2
- Sandbags: 15
- Light Discs: 1
- Light Meters: 1

**Checkout Hours:**
- Monday - Friday: 8am - 5pm

**Sound Theatre Hours:**
- Monday - Friday: 8am - 5pm
COMMON SENSE

Before diving into all of the more technical information about equipment, there are a few important “common sense” concerns that all students should take into account when preparing for and undertaking a shoot using Checkout’s gear.

- Read and understand your Checkout Agreement to avoid breaking policies and/or accruing fines.
- Do not leave equipment in a car, garage, outside or other cold places overnight. NEVER EVER leave anything electronic! If you do leave items such as C-Stands or Dolly Tracks in cold temperatures, condensation will form when they warm up which will rust the metal - you MUST wipe down these items with WD-40 to prevent this.
- When pulling any cable from a socket, pull from the end of the cable - not the cord - this will prevent the cord from weakening and eventually breaking.
- If you are unsure about the proper use of any piece of equipment, or have a problem during a shoot, do not hesitate to call Checkout: (406)994-6254. Consult before you act, not after!
- If equipment gets “stuck,” don’t force it, consult Checkout.
- If equipment breaks during your shoot, call Checkout as soon as possible so that work can begin on a solution to the problem as soon as possible.
- Do not leave gear unattended, keep track of everything you check out at all times.
- Return cables neatly wrapped and batteries fully charged.

ADAPTERS

Note:
Thunderbolt is the newest version of Apple's MiniDisplay Port. Thunderbolt is backward compatible so it can still be used to connect to DisplayPort devices; however, only the new port can be used to connect to Thunderbolt devices.

This means that while you can physically connect a Thunderbolt device to a Mac with DisplayPort, the device will not work, but if you connect a DisplayPort device to a Mac with Thunderbolt, then the device will work.

- VGA to Mini VGA
- Mini DVI Male to DVI Female
- DVI Male to DVI Female
- VGA female to 30-pin male
- VGA female to Lightning male
The batteries shown here are rechargeable and provided by Checkout. Any non-rechargeable batteries (AA, etc) will not be provided.

Do not drop batteries, all of them are worth at least $100 apiece and break easily when dropped.
Banana and 4/5-Pin Battery Belt

**Kit Information:**
*Volts:* 12v/8v  
*Charge Time:* 10 - 12 hrs.

**Notes, Tips & Tricks**  
- Used to power: 12 volt for Arri SR Series, and Video Tap, 8 volt for Arri S/E and Arri M  
- Never plug into equipment while attached to AC (wall) power.  
- Make sure that you have a cable that will adapt the correct output to your device.

5-Pin Battery Belt

**Kit Information:**
*Volts:* 12v  
*Charge Time:* 10 - 12 hrs.

**Notes, Tips & Tricks**  
- Used to power: 12 volt for Arri SR Series, and Video Tap, 8 volt for Arri S/E and Arri M  
- Never plug into equipment while attached to AC (wall) power.  
- Make sure that you have a cable that will adapt 5-pin output to your device.

Canon S-12 Internal Battery

**Kit Information:**
*Volts:* 12v  
*Charge Time:* 4 - 6 hrs.

**Notes, Tips & Tricks**  
- Used to power Canon Scoopic (Internal.)  
- Make sure you check that these batteries hold a charge before leaving checkout, as many of them are old.  
- DO NOT check these batteries with a voltmeter, it will burn them out.
**Panasonic Medium Battery**

**Kit Information:**
- **Volts:** 7.2v
- **Charge Time:** 3 - 4 hrs.

**Notes, Tips & Tricks**
- Used to power Panasonic HVX-200, and Panasonic DVX-100

**Scoopic External Battery**

**Kit Information:**
- **Volts:** 12v
- **Charge Time:** 8 - 10 hrs.

**Notes, Tips & Tricks**
- Used to power any 12-volt device, including Canon Scoopics.

**Panasonic Large Battery**

**Kit Information:**
- **Volts:** 7.2v
- **Charge Time:** 4 - 5 hrs.

**Notes, Tips & Tricks**
- Used to power Panasonic HVX-200, and Panasonic DVX-100

**Sony L-Series Small Battery**

**Kit Information:**
- **Volts:** 7.2v
- **Charge Time:** 3 - 4 hrs.

**Notes, Tips & Tricks**
- Used to power Sony PD-150, PD-170, HVR-V1U and HVR Z1U. Can also power the Sound Devices 722 and 702 hard disc recorders.
Sony V-Mount Battery

Kit Information:
Volts: 14.4
Model: BP-L60A

Notes, Tips & Tricks
• Used to power Monitors.

Sony L-Series Large Battery

Kit Information:
Volts: 12v

Notes, Tips & Tricks
• Used to power Sony PD-150, PD-170, HVR-V1U and HVR Z1U. Can also power the Sound Devices 722 and 702 recorders.

Canon Li-Ion C100 Battery

Kit Information:
Volts: 7.4v

Notes, Tips & Tricks
• Used to power Canon C100

Canon C100 AC Power

Notes, Tips & Tricks
• Used to power Canon C100

Dracast V-Mount Battery for Cion
Volts: 14.8
Model: DS-90S

Notes, Tips & Tricks
• Used to power AJA Cion

4 to 6 Pin Firewire 400

**Common Uses:**
- Deck to computer connection. Plug into deck first, computer should not be turned on until after firewire is attached.
- Attached to decks in the NLE.

6 to 6 Pin Firewire 400

**Common Uses:**
- Hard drive connection to computer.

4 to 4 Pin Firewire 400

**Common Uses:**
- Connection of camera to other 4-pin device.

Firewire 800

**Common Uses:**
- Hard drive connection to computer (9-pin) - faster than Firewire 400.

eSATA Cable

**Common Uses:**
- Really fast (3GB/s) connection.
- Work on specific lab computers.
<table>
<thead>
<tr>
<th>Cables</th>
<th>Common Uses</th>

</tbody>
</table>
4 to 4 Pin Power Cable

**Common Uses:**
- Used to adapt power for 12 volt devices from a battery belt. Make sure you know how many pins the belt and device have so that you get the correct cable.

4 to 5 Pin Power Cable

**Common Uses:**
- Used to adapt power for 12 volt devices from a battery belt. Make sure you know how many pins the belt and device have so that you get the correct cable.

3 Pin IEC Power Cable

**Common Uses:**
- Most common power connector, used for computers, monitors, hard drives, etc.

BNC Cable

**Common Uses:**
- Video and audio connection.

**Special Notes:**
- 75 ohm.
- They vary in length, get the size you need.

Component Video Cable

**Common Uses:**
- For higher quality (professional, HD) video sources, essentially the same as a three way RCA cord, but meant to transfer red-green-blue information instead of audio-video.
<table>

</tbody>
</table>
CABLES

USB-A 3.0 Cable
Common Uses:
- Connection of various devices to a computer.

Capable of transferring data at up to 5 Gbit/s – more than ten times as fast as the 480 Mbit/s top speed of USB 2.0. The “SS” symbol on the ends stand for SuperSpeed.

USB-A 3.0 to USB 3.0 Micro B mini Cable
Common Uses:
- Connection of various devices to a computer.

Thunderbolt Cable
Common Uses:
- Connection of various devices to Thunderbolt equipped Apple computers.

VGA to Component Cable
Common Uses:
- Connection of (Windows) computer to video receiver.
Cannot convert analog signal to digital.

1/4in. Male to XLR Male
1/4in. Male to XLR Female

RCA Male to XLR Female

1/8in. Male to XLR Female

Duplex Cable

Common Uses:
- Running sound signal from boom microphone to recorder and from recorder to operator’s headphones simultaneously.

1/4in. Male to 1/4in. Female

Common Uses:
- 1/4” headphone extension for on-set sound.
- Most commonly used with DAT recorder.
CABLES

1/4in. Cable
Common Uses:
- 1/4” audio device connection.

1/8in. Cable
Common Uses:
- Audio source to audio input. (ex. Laptop to auxiliary, iPod to whatever.)

XLR Cable
Common Uses:
- Connection of microphones to audio recording devices. Lengths vary.

Mini XLR Male to XLR Female

RCA Male to XLR Male
Types of Apple Power Connectors

- Apple 30-pin
- L-Style
- T-Style
NEVER use a video camera as a deck. It wears out the head and would eventually make the camera unusable.

All lenses should be returned with aperture wide open.

Turn cameras off before changing the tape.

Cameras usually come with a UV filter attached to protect the lens. Make sure it is there when you pick up the camera. If you take it off, put it back on before you return the camera.

Do not leave the tripod plate attached to the camera when returning.
Arriflex M

Kit Information:
Aspect Ratio: 1.33:1 (4:3)
Lenses: Angenieux 12-120mm - T2.1 (Takes 72mm Filters)
Lens Mount: Arri Standard Bayonet
Accessories: 72mm Filters, Intervalometer, Arri Shoulder Mount
Tripods to Use: Cartoni C 20 S Tripod, Bogen 3066, Bogen 3066 Baby Legs, Bogen 510
Necessary Tripod Screw Size: 3/8-16"
Format: 16mm, B-wind - Single or Double perf.
Kit Weight: 14.5
Power: 8V only, 3-pin to banana

Notes, Tips & Tricks:
• Attach only one lens at a time!
• This camera does not take daylight spools.
• When you put in a new motor, watch for the notch near the bottom that allows the motor to slide fully into the camera body.
• Be careful not to misplace the cap that comes off of the camera body when attaching a mag to the camera.
• Each of the three turret mounts on the front of the camera has a cap as well. Don’t lose these, either.
• Similar to the Arriflex S/B.
• Can be ramped with variable-speed motor.
• Must be loaded in changing bag or absolute darkness.
• Compatible with 4 1/2 Filter Set. (Pg. 51)

**Kit Information:**

*Aspect Ratio*: 1.33:1 (4:3)
*Lenses*: Angenieux 12-120mm - T2.1
(Takes 72mm Filters)
Schneider-Kreuznach 10mm – T1.8
Schneider-Kreuznach 25mm – T1.4
Schneider-Kreuznach 50mm – T2
Kilar Macro 4cm – T2.8

*Lens Mount*: Arri Standard Bayonet
*Accessories*: Intervalometer, Arri Shoulder Mount,
2x2 Lens Filters

*Tripods to Use*: Cartoni C 20 S Tripod, Bogen 3066
Bogen 3066 Baby Legs, Bogen 510

*Necessary Tripod Screw Size*: 3/8-16"
*Format*: 16mm, B-wind - Single or Double perf.

*Kit Weight*: 47
*Power*: 8V only, F-banana to M-banana

**Notes, Tips & Tricks:**

- Attach *only one* lens at a time!
- When you put in a new motor, watch for the notch near the bottom that allows the motor to slide fully into the camera body.
- Don't misplace the cap that comes off when you attach a mag onto the body.
- The turret mounts on the front of the camera each has a cap, don't lose these either.
- When using the 400ft mag, the eyepiece is difficult to look through.
- Make sure to set the film in the gate and then set the claw before closing the pressure plate.
- Once the film is threaded through the rollers, make sure they are pressed against the film, this will keep the film registered within the sprocket holes.
- This camera can be used with daylight spools.
- Similar to the Arriflex M.
- Compatible with 4 1/2 Filter Set. (Pg. 51)
Arriflex 16 SR 1

Kit Information:
Aspect Ratio: 1.33:1 (4:3)
Lenses: Angenieux 10-150mm T2.3, Zeiss 9.5mm T1.2, Zeiss 12mm T1.2, Zeiss 16mm T1.2, Zeiss 25mm T1.2, Kinoptik 5.7mm T1.8
Lens Mount: Arri Standard Bayonet

Zoom Lens 17-85mm Lens Shade
Zoom Lens 18-86mm
Zoom Lens 18-86mm Lens Cap
Zoom Lens 18-86mm Lens Shade
Zoom Lens 25-100mm

Kit Information:
Aspect Ratio: 1.33:1 (4:3)
Lenses: Kern-Pollard 18-86mm T2.5, Som 17-85mm T3.8, Canon 25-100mm T1.8, Switar 10mm T1.6, Soligor 15mm T1.9, Switar 25mm T1.4, MacroSwitar 26mm T1.1, Canon 50mm T1.8, Macro Switar 75mm T1.9, Soligor 75mm T1.9
Lens Mount: C Mount
Tripods to Use: Bogen 3066 Tripod
Bogen 3066 Baby Legs
Peter Lisand Tripod
Bogen 510
 Necessary Tripod Screw Size: 3/8-16” or 1/4-20”
Format: 16mm, B-wind - Single or Double Perf.
Kit Weight: Camera Box (1)- 25.5lbs, Lens Box (2), 11lbs.

Notes, Tips & Tricks:
• This is a wind up camera, it does not need a battery.
• While winding, do not overcrank.
• Can be used with daylight spools.
• Use only one lens at a time!
**Canon Scoopic**

**Kit Information:**
- **Aspect Ratio:** 1.33:1 (4:3)
- **Lenses:** (Built-in) Canon C-16 Zoom 12.5-75mm T2.5
- **Tripods to Use:** Bogen 3066 Tripod, Cartoni Alfa-II, Peter Lisand Tripod
- **Necessary Tripod Screw Size:** 3/8-16” or 1/4-20”
- **Format:** 16mm, B-wind - Single or Double Perf.
- **Kit Weight:** Box 1 - 17.5lbs

**Notes, Tips & Tricks:**
- Takes daylight spools.
- It is not necessary to load this camera in total darkness, however, use included duvetyn to block light.
- NEVER use external and internal batteries at the same time.
- Do not trust the internal light-meter.
- Fixed lens camera, do not try to remove.
- Do not ramp speeds!
- Takes 72mm filters. (Pgs. 55-57)
- DO NOT check internal batteries with a voltmeter.

**Reservable Item**

*Kit ID:* Scoopic #1 - 10

*Kit Contents:*
- Camera Body
- Power Cord
- Daylight Core
- Case

---

*Above:* The Scoopic speed dial. The Scoopic can shoot up to 64 frames per second, but it cannot be ramped.

*Above:* Power cord for the Scoopic, a 5 pin power cable (which can attach to an external Scoopic battery or battery belt) to a camera specific 4 pin connection.
Kit ID: C100 MarkII (#1-7)

Kit Contents:
- 100-400mm Lens
- 100-400mm Lens Cap
- 100-400mm Lens Rear Cap
- 100-400mm Lens Case
- 100-400mm Lens Hood
- 100-400mm Lens UV Filter
- 24-105mm Lens
- 24-105mm Lens Cap
- 24-105mm Lens Rear Cap
- 24-105mm Lens Hood
- 24-105mm Lens UV Filter

*Recording Media:* MicroSD card slot x 1 (Class 10 memory card required)
- MicroSD card slot (up to 64GB cards)
Sony CX 160 / 1st Year Kit

**Kit Information:**
- **Aspect Ratio(s):** 16:9, 4:3
- **Lenses:** Built-in
- **Tripods to Use:** Libtec
- **Necessary Tripod Screw Size:** 1/4-20
- **Format:** AVCHD - NTSC
- **Kit Weight:** 2.5lbs

**Notes, Tips & Tricks:**
- Our NLE does not accept 60P...you MUST shoot in 60i
- Focus assist doesn't work very well in wide, you should zoom in, focus, and zoom back out.
- Autointelligence sort of sucks...you have to turn it off in order to change anything to manual.

**Reservable Item**

**Kit IDs:** CX 160

**Kit Contents:**
- Camera Body
- Battery
- Battery
- Battery Charger
- AC Adaptor & power cord
- Component A/V Cable
- A/V Connecting Cable
- USB Extension Cable
- S-Hook/Sandbag Holder
- Car Power Adaptor
- Manual
- Grey Card
- Pelican Case

**Libtec Tripod**
- Tripod Plate
- Tripod Plate Screws (2)
- Tripod Bag
- Sandbag

Below: The Sony CX 160 with its LCD screen open.

Left: The CX 160 in its case.

Left: Tripod and sandbag included in first-year kit.
Panasonic HVX200 HD

Kit IDs: HVX 3 & 4

Kit Contents:
- Battery Charger
- Camera Body
- Component Cable
- Lens Cap
- P2 Card 1
- P2 Card 2
- P2 Store Manual
- Pelican Case
- Power Adapter
- Power Cord
- Remote Control
- Silica Gel Pack
- USB 2.0 Cable

Notes, Tips & Tricks:
- Use only Panasonic DV tapes.
- Do not lose XLR covers.
- Always have P2 cards in the case, camera or dump drive.
- Battery mounts are fragile and expensive, be careful.
- Component cable connection is fragile and finicky, must be supported.
- For more information about the functionality of the HVX, check out the HVX user's manual (available at Checkout.)
- Contains two built-in ND filters, 1/8 = 1 stop, 1/64 = 2 stops.
- If you feel resistance when changing focal length manually, the servo is engaged, flip the switch on the side of the camera from A (Auto) to M (Manual.)
Panasonic AF100

Kit ID: AF100
Kit Contents:
- AF100 Body
- Panasonic Battery Charger
- AC Adapter
- Nikon mount lens adapter
- Remote
- Panasonic body cover
- Pelican Case

Kit Information:
- Aspect Ratio(s): 16:9
- Lenses: SD Lenses, Nikon lens kit - Vivtar lens kit (separate kits)
- Lens Mount: Panasonic Lens mount
- Accessories: Nikon lens kit - Vivtar lens kit - AF100 Follow Focus kit
- Tripods to Use: Bogen Manfrotto
  - Cartoni Beta
  - Miller-Cartoni
  - Vinten
  - Glide Cam
- Necessary Tripod Screw Size: 1/4 20
- Formats: AVCHD - AVCCAM
- CCD Size: Micro 4/3
- Kit Weight: 15lbs

Notes, Tips & Tricks:
- In order to use the XLR inputs you must remove the XLR covers. These covers do not attach to the camera, so make sure you do not lose them.
- The AF100 has a micro 4/3 (MFT) mount. In order to use the Nikon lenses that come in the separate kits, you need to use the Nikon adapter that comes in the kit. This will give you a lens factor of...
AJA Cion Compact Prime (CP)

Kit ID: Cion Compact Prime Kit (CP)

Kit Contents:
- 125v Power cable
- 1/4 20 Screw
- 3/8 16 Screw
- 4x5.650 Filter Tray x2
- 4x5.650 Filter Tray Rack
- AC Adapter
- Accessory Bag
- Adjustable Base Plate
- Alley Key
- Battery Charger
- Body Cap
- Building Guide
- Camera Body
- Follow Focus
- Follow Focus Marker
- French Flag
- 21mm lens
- 35mm Lens
- 50mm Lens
- 85mm Lens
- Lans Cap x4
- Matte Box
- Pelican Case
- Rear Cap x4
- Remote
- Rod - long 15mm x2
- Rod - Short 15mm x2
- Rubber Bellow
- SD Card
- Whip

Reservable Item

Kit Information:
Sensor: 22.5 x 11.9 mm (4K APS-C sized)

Lenses: Zeiss Compact Prime

Lens Mount: Nikon Lens mount

Tripods to Use: Bogen Manfrotto
- Bogen 3066
- Miller-Cartoni
- Sachtler

Formats: DCI 4K, Ultra HD, 2K, 1080P, 1080i

Recording Media: AJA Pak Media

Outputs: 4 x 3G/HD-SDI
- 2 x 3G/HD-SDI Monitor

Outputs:
- 1 x HDMI 1.3 output
- 1 x HDMI 1.4 output
- 1 x Headphone jack

Camera Weight: 14 lbs (without lens)

Kit Weight: 60 lbs

Lens Information:

Focal Length: 85mm, 50mm, 35mm, 21mm,

Aperture: F 2.1

(85mm, 50mm, 35mm)

F 2.9 (21mm)

Filter Size: 110mm

Lens Mount: EF

a Zeiss CP lens

Sidefinder and HD Monitor
Panasonic HPX-600 (with/without Sticks)

Kit ID: Panasonic HPX-600

Kit Contents:
- A/V to RCA Cable
- AC Adapter
- 125v Power Cable
- Camera Body
- Hard Case
- Micro P2 Card
- P2 Card Adaptor
- P2 Card Case
- Quick Release Plate VCT-U14
- Sensor Cap
- Shotgun Mic
- Shoulder Strap
- USB 3.0 Card Reader
- USB 3.0 Card Reader Cable
- User Manual
- Viewfinder
- V-Mount Battery Adaptor
- V-Mount Charger

With Sticks:
- Satchler Pan Handle
- Satchler Tripod Case
- Satchler Tripod Legs
- Satchler Tripod Quick Release Plate
- Satchler Tripod Spreaders

Reservable Item

Kit Information:
Sensor: 2/3” MOS
Aspect Ratio(s): 16:9
Tripods to Use: Sachtler
Necessary Tripod Screw Size: 1/4-20
Audio Formats:
- PCM Digital, 48KHz/16 bit
- 4CH (AVC-Intra 100/50, DVCPro HD, DVCPro50)
- 2CH/4CH selectable (DVCPro, DV)
Video Formats:
- AVC-Intra 100/50, DVCPro HD, DVCPro 50, DVCPro 25, DV
- 1080/720 switchable, including 24p (23.98pN)
- 50Hz/59.94Hz switchable (PAL/NTSC)
Recording Medium: P2 card

Lens not included in kit.
Sony HVR-V1U

Kit Information:
Aspect Ratio(s): 16:9, 4:3
Lenses: Fixed mm - mm 62mm Diameter.
Accessories: Varizoom Control, Doublers, Diopters
Tripods to Use: Bogen-Manfrotto
  - Cartoni Beta
  - Glidecam
  - Miller-Cartoni
  - Vinten
Necessary Tripod Screw Size: 1/4-20
Formats: 1080i HDV, MiniDV, DVCAM
CCD Size:
Kit Weight: 12.5 lbs.

Notes, Tips & Tricks:
• Shoots at high speeds, but image quality decreases as drive speed increases.
• Needs BNC to RCA adapter for use with HD monitors.
• You must be shooting in DVCAM mode in order to record a different audio rate.
• Kits 4 and 5 do not come with a rain cover.
• The camera has a CMOS chip, not a CCD.

Reservable Item

Kit ID:
Kit Contents:
A/V to RCA Cable
AC Adapter

- Silica Gel Pack
- USB Cable
- UV Filter
- XLR Adapter Shoe Mount

Kit Information:
- Aspect Ratio(s): 16:9
- Lenses: Fixed 41mm - 410mm
- Accessories: Amphibico Underwater Housing
- Tripods to Use: Bogen Manfrotto, Cartoni Beta, Glidecam, Miller-Cartoni, Vinten
- Necessary Tripod Screw Size: 1/4 20
- Formats: HDV - 1080/60i, MiniDV - NTSC
- CCD Size:
- Kit Weight: 15.5 lbs.

Notes, Tips & Tricks:
- This camera is specifically for use with the underwater housing, it may be checked out separately but you must make a special reservation.
- Has infrared “Night Shot” mode.
- Batteries are Kit specific and included.
- Lens hood has a special method of attachment. Ask at Checkout.

Reservable Item
Only for use with Amphibico Housing unless otherwise approved
Sony HVR-Z1U

Kit Information:
Aspect Ratio(s): 16:9
Lenses: Built-in 4.5mm - 54mm
Accessories: Amphibico Underwater Housing, Varizoom Control
Tripods to Use: Bogen Manfrotto
  - Cartoni Beta
  - Glidecam
  - Miller-Cartoni
  - Vinten Tripod
Necessary Tripod Screw Size: 1/4" 20
Formats: HDV - 1080/60i, 1080/50i, MiniDV - NTSC
CCD Size:
Kit Weight: 22.5 lbs.

Notes, Tips & Tricks:
• This camera is specifically for use with the underwater housing, it may be checked out separately but you must make a special reservation.

Reservable Item
Only for use with Amphibico Housing unless otherwise approved

Kit ID: Z1U #1
Kit Contents:
AC Adapter w/Cord
Battery Charger Cord
Battery Charger
Lens Hood
Mini Triple RCA Cable
Pelican Case
RGB Cable
Remote
Viewfinder Eyepiece
Camera Body
Kit Information:

Aspect Ratio(s): 16:9, 4:3
Lenses: Fixed Lens
Lens Mount: 2/3” Bayonet
Accessories: Varizoom Control, Diopters, Doubler, Underwater Housing
Tripods to Use: Bogen-Manfrotto, Cartoni Beta, Glidecam, Miller-Cartoni, Vinten
Necessary Tripod Screw Size: 1/4-20
Formats: MiniDV, DVCAM
CCD Size: 1/3 inch, 3x CCD
Kit Weight: 12.5 lbs

Notes, Tips & Tricks:
- Has zoom control on lens hood, a better lens hood and better audio than the PD-150.
- The LCD screen is color and the eyepiece is black and white.
- Important Audio Information: When set to CH1, both XLR inputs operate independently. When CH1 and CH2 are selected, only CH1 is used and the audio from CH1 is duplicated onto CH2.

Kit ID: PD170#1 - 9
Kit Contents:
- Camera Body
- AC Battery Attachment
- AC Adapter
- Battery Charger
- Lens Hood
- On-Camera Mic
- Raincover
- Power Cord
- RCA Cable
- Remote
- Case
- Polarizer
- UV Filter
- Wide Angle Adapter
- Wide Angle Lens Cap
- Wide Angle Lens Hood
- Power Cord
- Silica Gel Pack
CAMERA ACCESSORIES

METERS: Analog/Digital Light Meter

Reservable Item

Analog Light Meter

Notes, Tips & Tricks:
- Make sure you know whether or not the high slide is in when metering.
- Do not lose the high slide, it is small and sometimes loose.
- Do not remove the incident bulb.

Kit IDs: Analog Meter: 1 - 3
Kit Contents:
- Analog Light Meter
- Light Meter Case

Above: The analogue light meter and case. All meters have rotating heads and protective slides for outdoor bright-light metering.

Reservable Item

Kit ID: Digital Light Meter 4-22
Kit Contents:
- Digital Light Meter
- Light Meter Case

Digital Light Meter

Notes, Tips & Tricks:
- Cases easily come open, make sure you properly secure the light meter.
- Has both spot and incident capability, just slide the bulb.
- Check out a manual if you don't know how to use a digital light meter.

Left: Checkout has more than one kind of digital light meter, make sure you know how to use the one you get.
Color Meter and Video Tap

Minolta Color Meter

Notes, Tips & Tricks:
- Check out the manual if you are unsure how to operate the color temperature meter.
- Tungsten light measures at around 3200 degrees Kelvin and daylight measures at around 5600 degrees Kelvin.

Left: The color temperature meter is good for when you are trying to match a scene shot over two days or a longer period of time.

Video Tap

Notes, Tips & Tricks:
- If you tilt the video tap (dutch angle) it will also tilt the image on your monitor. It is essentially just a small camera that looks into the eyepiece.
- DO NOT attempt to charge the battery while powering the video tap. It will shock you and fry the video tap.
- If it shocks you, unplug everything and start over.
- Use only with SR series cameras.

Reservable Item

Kit ID: Color Meter
Kit Contents:
Minolta Color Meter
Color Meter Case

Case

Below: Great for having the director or a script supervisor look at acting performance from a monitor rather than cram 6 people in a bathroom.
CAMERA ACCESSORIES

Changing Bag and Changing Tent

Non-Reservable

Kit IDs: CB1 - CB6
Kit Contents:
Changing Bag

Notes, Tips & Tricks:
• There are only six of these. That means that there is only one to go with each film camera that needs one, the SR1, SR2-A, SR2-B, M, S1 and S2. If you get a Scoopic or the Bolex, you should use daylight spools as much as possible because there will not be a changing bag available for you to checkout.
• The S/B cameras take daylight spools, but can also use a 400 foot mag. That is why they are in the group listed above.
• Visually inspect changing bag for holes, tears, dust and dirt - the best to check for light leaks is to stick your head into the bag in a bright area.

Reservable Item

Kit ID: T1- T2
Kit Contents:
Bag
Tent
Pole 1
Pole 2

Changing Tent

Notes, Tips & Tricks:
• There are only two of these. . If you get a Scoopic or the Bolex, you should use daylight spools as much as possible because there will not be a changing bag/ tent available for you to checkout.
• The S/B cameras take daylight spools, but can also use a 400 foot mag. That is why they are in the group listed above.
• Visually inspect changing tent for holes, tears, dust and dirt - the best to check for light leaks is to stick your head into the bag in a bright area.

Above: A film changing bag is one of the most important things to keep safe on a film shoot. If it gets ripped and someone does not notice, it could ruin your film before you even send it out to the lab.

Above: Changing Tent with Bag
Slates

**Reservable Item**

**Kit IDs:** Large Slate 1 - 7, Grad Clap Slate A & B  
**Kit Contents:** Large Slate

---

**Large Slate**

**Kit Information:**

**Notes, Tips & Tricks:**
- Slate must be clean when returned to Checkout. Pull off all tape and wipe off all marker. Tape use is recommended over marker because sometimes marker is difficult to clean off, even if it is “dry-erase.”
- Use properly.

---

**Reservable Item**

**Kit IDs:** Small Slate 1, 3 - 12  
**Kit Contents:** Small Slate

---

**Small Slate**

**Kit Information:**

**Notes, Tips & Tricks:**
- Slate must be clean when returned to Checkout. Pull off all tape and wipe off all marker. Tape use is recommended over marker because sometimes marker is difficult to clean off, even if it is “dry-erase.”

Field Monitors

Kit ID: FM1 & FM2
Kit Contents:
- BNC Cable
- Panasonic 17in Monitor
- Pelican Case
- Power Cable

Kit ID: MHD1 & MHD2
Kit Contents:
- AC Adapter
- Portabrace Case
- Power Cable
- Component Cable
- Monitor

HD Field Monitor
Kit Information:
Inputs: Component with a BNC input.
Notes, Tips & Tricks:
- Calibrate the monitor each time you check it out.

Kit ID: M1 & M2
Kit Contents:
- BNC Cable
- BNC Cable Adapter
- Portabrace Case
- Power Cable
- Monitor

SD Field Monitor
Kit Information:
Inputs: S-Video, BNC
Notes, Tips & Tricks:
- Needs to be adapted from V1U component out to monitor component in.

Above: the inputs on the back of the monitor.
Camera Accessories

Miscellaneous

**Reservable Item**

**Kit ID:** LCD Magnifier A & B  
**Kit Contents:**  
LCD Magnifier  
Case

**Kit Information:**  
Attachable to: Sony PD150, Sony PD170

**Non-Reservable**

**Magnifying Lenses**

**Kit Information:**  
**Diameter:** 72mm

**Notes, Tips & Tricks:**  
- Attaches to the end of the lens like a filter.  
- Used to take extreme close-ups.

**Non-Reservable**

**Kit IDs:** 1-3  
**Kit Contents:**  
Measuring Tape

**Notes, Tips & Tricks:**  
- Tape is soft canvas rather than metal.  
- Useful for measuring distance, height, etc.

Above: Can be very important for focus in case a camera’s back focus is off.
Underwater Housings/Gear

**A1U Underwater Housing**

*Kit ID:* UH1  
*Kit Contents:*  
Housing  
Pelican Case  
Spare O-Rings, Lube, Wrench  
White Card

**Notes, Tips & Tricks:**
- You cannot change the battery for the A1U camera with the baseplate for the housing still attached.  
- When shipping, always leave the housing door open.  
- Make sure that the O-rings are not cracked or showing any signs of visual damage. They should be supple and well lubricated.

**PD-170 Underwater Housing**

*Kit ID:* UH2  
*Kit Contents:*  
Allen Keys and Lube  
Focus Ring  
Pelican Case  
LANC Cable and Viewfinder Stopper  
Housing  
Handle  
Internal Filter Ring  
Spare O-Rings  
Manual

**Notes, Tips & Tricks:**
- As you go deeper, pressure increases and squeezes the housing more tightly together. If there are any leaks, they will generally manifest themselves during the first few feet of submersion. Place housing in shallow water and look for leaks before going deeper.
Underwater Housings/Gear

**Z1U Underwater Housing**

**Kit ID:** UH4  
**Kit Contents:**  
- Allen Keys (x2)  
- LANC Cable  
- Neoprene Viewfinder Cover  
- Pelican Case  
- Phenom Housing  
- Phenom Housing Handle  
- Spare O-Ring Kit and Lube  
- Spare O-Ring Kit and Lube  
- Phenom Manual

**Notes, Tips & Tricks:**  
- Remove O-Rings when not in use or they wear out too quickly.  
- Works great down to -2º C water  
- Balances well while swimming  
- Best “ready-to-go” camera, no extra batteries needed

---

**Reservable Item**  
**Certification Req.**  
**Amphibico Light**

**Kit ID:** UH3  
**Kit Contents:**  
- 2 X Discovery 10 Light  
- Extended T-Bracket  
- Light Extension Arm  
- Pelican Hard Case  
- Spare O-Rings and Lube

The light with the push dial needs to be turned on before entering super cold water or it will not work!

Reservable Item Certification Req.

V1U Underwater Housing

Kit ID: UH5 for V1U

Kit Contents:
- Endeavor Underwater Housing
- Bulkhead Screw
- Bulkhead Screw Bolt
- Dome Port
- O-Ring Kit
- Spare Dome Port
- Spare Dome Port Case
- Travel Case

Notes, Tips, and Tricks:
- This is the nicest of our underwater housing... It happens to be the only one with a live viewfinder.
- This only works with the Sony V1U, a really nice HD camera.
- Whenever you use an underwater port, MAKE SURE that the O-rings are greased and in place.
- Do not store the housing with the O-rings in place, this puts unnecessary stress on the rings and can cause them to break... which is bad when you are underwater!
- View finder needs extra batteries -4 AA high capacity NiMH batteries are necessary for longer than 30 minutes.
- Underwater, it doesn’t balance right, so it needs some jerryrigging of extra weights to shoot level.

Above: The Endeavor Housing is the only housing to feature a live viewfinder in the housing!

Above: Easy Iris Control at your fingertips! All controls are easily reached, even the menu.
LENSES: HD Lens 36X

Fujinon 36x HD Lens (for Sony 700)

Kit Information:
Focal Length: 10.5 - 378mm
Aperture: f2.2 - f16
Filter Size: 127mm
Lens Mount: PL Mount

Notes, Tips & Tricks:
• When mounting the 36x, make sure the support washer spins freely until the screw is completely tightened. Only then should you tighten the lens support itself.

Kit ID: 36xHD
Kit Contents:
- Lens
- Lens Support Bolt
- Lens Support Screw
- Lens Support Washer
- Support Locking Screw
- Focus Control FMM-3B
- Focus Control Cable
- Focus Control Handle
- Lens Support
- Zoom Control Handle
- Pelican Case

AF100 Advanced Kit

**Reservable Item**

**Kit ID:** AF100 Advanced Kit  
**Kit Contents:**  
- Rails  
- Rail extender  
- Camera Mount  
- Follow Focus  
- Matte Box  
- Eyebrow  
- 5x Lens gears  
- Long Lens adapter  
- 2x Filter Mounts

**AF100 Advanced Kit (Follow Focus)**  
**kit weight:** 12 lbs.  
**Notes, Tips, and Tricks:**  
- The rail system can be extended for longer lenses.  
- The Matte box can be opened so that lenses can be changed without needing to remove the box.

The Matte Box can be opened to make lens changing easy.

There are five gear rings for quick and easy lens changes. Also, the kit includes rail extensions and large lens support.

There are two places for filters.
All filters must be returned clean - free of dust or fingerprints. Use a lens cleaning kit to clean filters.

When shooting tungsten film outside, use an 85 filter to correct to daylight (5600K).

When shooting daylight film inside, use an 80A filter to correct to tungsten (3200K).

**Notes:**
- F-Stop Increase refers to the change in exposure needed to keep the same exposure time when using a filter.
FILTERS: 72mm

**80A:** Used for converting daylight film for use with 3200K lamps.  
*F-Stop Increase:* 2

**81A:** Used for balancing daylight film to electronic flash.  
*F-Stop Increase:* 1/3

**81C:** Used to permit the use of clear flash lamps.  
*F-Stop Increase:* 1/3

**82A:** Used to help stop excessive red of morning or evening light.  
*F-Stop Increase:* 1/3

**82B:** Used the same as an 82A, but with cooler results.  
*F-Stop Increase:* 2/3

**85:** Used for converting tungsten film for daylight balanced light sources.  
*F-Stop Increase:* 2/3

**85A:** Decreases the color temperature slightly more than an 85 filter.  
*F-Stop Increase:* 2/3

**85B:** Used for converting type B film to daylight.  
*F-Stop Increase:* 2/3

**85C:** Used for converting daylight in late afternoon when full 85 is too warm.  
*F-Stop Increase:* 2/3

**85N.3:** Same as an 85 filter with an ND.3 on it.  
*F-Stop Increase:* 1 2/3
CAMERA FILTERS

FILTERS: 72mm

85N.6:
Same as an 85 filter with an ND.6 on it.
F-Stop Increase: 2 2/3

85N.9:
Same as an 85 filter with an ND.9 on it.
F-stop Increase: 3 2/3

CCA12:
Same as 85 filter, made by Canon.
F-Stop Increase: 2/3

Circular Polarizer:
Polarizes light. Increases contrast and gets rid of reflections.
F-Stop Increase: 2

Graduated N.6:
Is half ND.6 and half clear with a smooth transition in between.
F-Stop Increase: 2

Close-Up Lens:
Used for extreme close-up photography. A magnifying lens.
F-Stop Increase: None

FLB:
With Type A film, used to eliminate blue-green cast by fluorescent bulbs
F-Stop Increase: 1

FLD:
With daylight film, used to eliminate blue-green cast by fluorescent bulbs.
F-Stop Increase: 1

Green 11:
Used for B&W film. Provides pleasing flesh tones against the sky.
F-Stop Increase: 2

Haze:
Used for reducing blues by absorbing UV.
F-Stop Increase: None

Kit IDs: 4 1/2 Filter Set
Kit Contents:
Case
4 1/2 Adapter Ring
Haze 2A Filter
Clear Round Filter
Double Fog Filter
Center Spot Filter
Split Diopter

Notes, Tips & Tricks:
• Can be attached to Scoopics.
• Can be attached to 72mm filter compatible lenses in Arri S/B and Arri M kits.
• Can also be attached to the Angenieux variable lens that comes with the Aaton XTR.

The split diopter and lens hood on a zoom lens.
FILTERS: Series 9 Filter S

**Kit IDs:** Series 9 Filter Set

**Kit Contents:**
- Case
- 4 1/2 Adapter Ring
- Haze 2A Filter
- Clear Round Filter
- Double Fog Filter
- Center Spot Filter
- Split Diopter

**Notes, Tips & Tricks:**
- Can be attached to Scoopics.
- Can be attached to 72mm filter compatible lenses in Arri S/B and Arri M kits.
- With included 58mm ring, can be attached to PD-150.
CAMERA SUPPORT

Common thread sizes: 1/4-20 (Small), 3/8-16(Big)

Be careful to keep track of and return plates and screws - do not leave them attached to the camera when returning.

Some cameras are too big for some tripods - make sure to check out a tripod that is approved for use with your camera package.

Return with arm locked down and Pan/Tilt loose. DO NOT leave the arm loose, or it may strip itself out.

Fluid heads can freeze, they MUST be kept in a warm place overnight.
Bogen 3066 Baby Legs

Kit Information:

- **Ball Size:** 100mm
- **Height:** 19” - 26”
- **Weight Capability:** 22 lbs.
- **Screw Sizes:** 3/8-6, 1/4-20
- **Attachable Cameras:** All Cameras
- **Number of Stages:** 2

Notes, Tips & Tricks:

- Tripod screws are stowed under the plate. You must remove the plate to get to them.
- The Baby Legs' head is the same as the head for the full sticks, they are interchangeable. The 3066 head can also be used with the Losmandy Porta-Jib.
- Compatible with Bogen Rollers.
- Be careful with the locking levers on the legs, they can break off.

Kit ID: BL 1 & 2

Kit Contents:
- Bogen Baby Legs
- Plate
- Head

Reservable Item

Above: Head and plate of Bogen Baby Legs

Right: The Baby legs compared to the regular Bogen tripod.
CAMERA SUPPORT

Bogen 3066 Tripod

Kit ID: BG 1-4
Kit Contents:
- Bogen Sticks
- Head
- Plate
- Spreader
- Screws

Below: The head of a Bogen 3066 is the same as the baby Bogen 3066

Above: Looking down at the level of a Bogen 3066

Kit Information:
- Ball Size: 100mm
- Height: 35” - 59”
- Weight Capability: 22 lbs.
- Screw Sizes: 3/8 - 16, 1/4 - 20
- Attachable Cameras: All Cameras
- Number of Stages: 2

Notes, Tips & Tricks:
- Tripod screws are stowed under the plate. You must remove the plate to get to them.
- The Losmandy Porta-Jib uses the 3066 head, so you will need to check out this tripod or the baby legs if you are planning to use the jib.
- Compatible with Bogen Rollers.
- Be careful with the locking levers on the legs, they can break off.
Bogen Rollers

Notes, Tips & Tricks:
• The Bogen rollers allow easy movement of tripods on smooth surfaces such as the studio floor, however, do not use them outdoors or they will get gummed up.
• Compatible with: Bogen 3066 Tripod & Baby Legs, Cartoni C20 Tripod and Bogen Manfrotto Tripod.

Left: Used to make almost any tripods into dolly's. Great for shooting in Studio B.

Above: The Bogen tripod on the rollers.
Bogen Manfrotto Tripod

**Kit Information:**
- **Ball Size:** N/A
- **Height:** 20.5” - 70.1”
- **Weight Capability:** 17.6 lbs.
- **Screw Sizes:** 1/4-20
- **Attachable Cameras:** A1U, V1U, Z1U, PD-170, PD-150, DVX100 and HVX200
- **Number of Stages:** 3

**Notes, Tips & Tricks:**
- Only MF1 comes with a spreader.

**Kit ID:** MF1 - MF7

**Kit Contents:**
- 503 Tripod Head
- Spreader
- Arm
- Sticks
- Plate
- Case
Cartoni Alfa-II Tripod

Kit Information:
- Ball Size: 100mm
- Height: 33” - 62”
- Weight Capability: 22 lbs.
- Screw Sizes: 1/4 - 20
- Number of Stages: 2

Notes, Tips & Tricks:
- If the plate will not stay fully latched, don't panic, there is a small phillips screw that needs to be tightened on the right side of the head, check this before leaving with gear so that Checkout can fix it.
- The spring under the tripod plate often detaches from the lock lever. This will cause the plate to not latch correctly. Test this before leaving and notify Checkout so that it can be fixed.
- The feet can be removed, make sure that they are all present when checking tripod out and when returning tripod.
- When attaching the plate, insert the plate at an angle and then set it flat so that it clicks to lock. It will not slide in from the front or back.
- Read the opening page of the camera support section for additional, mandatory information about tripods.

Reservable Item

Kit ID: C1 - C25
Kit Contents:
- Bag
- Plate
- Cartoni Sticks

Below: The Cartoni Alfa set up, notice the padded rubber feet.

Left: The Cartoni Alfa bag

Above: This is the proper way to attach the plate to the head, it snaps down - it does not slide in!
Cartoni Beta Tripod

**Kit Information:**
- **Ball Size:** 100mm
- **Height:** 29” - 54”
- **Weight Capability:** 22 lbs.
- **Screw Sizes:** 1/4-20, 3/8-16
- **Attachable Cameras:** A1U, V1U, Z1U, PD-170, PD-150, DVX100, HVX200, Arri M, Arri S/B and Scoopics
- **Number of Stages:** 2

**Kit ID:** B1 - B2

**Kit Contents:**
- Spreader
- Arm
- Head
- Sticks
- Plate
- Case

**Right:** with sticks partially extended and case.

**Right:** the head and plate.

---

**Cartoni C 20 S Tripod**
**Cartoni C 20 S Tripod**

**Kit Information:**
- **Ball Size:** 100mm
- **Height:** 20” - 72”
- **Weight Capability:** 66 lbs.
- **Screw Sizes:** 3/8-16, 1/4-20
- **Attachable Cameras:** All film Cameras
- **Number of Stages:** 2 - 2

**Notes, Tips & Tricks:**
- Plate on tripod slides to balance camera so it is not front or back heavy. (Use dial on side.)
- Compatible with Bogen Rollers.
- Spreaders attach on bottom, feet must be removed to attach them. DO NOT LOSE THEM.

**Kit ID:** CA  
**Kit Contents:**
- Baby Legs  
- Baby Legs Case  
- Head  
- Head Case  
- Plate  
- Spreader  
- Tall Legs  
- Tall Legs Case  
- Tripod Foot  
- Tripod Foot  
- Tripod Foot  

**Reservable Item**

Above: The head of the C 20 S tripod.
Glidecam 4000 Pro

Kit Information:
Arm Length: 15’
Weight Capability: 28.6 lbs.
Screw Sizes: 1/4-20, 3/8-16

Notes, Tips & Tricks:
• Takes a long time to balance properly. Plan accordingly.

ABC Jib Kit

Kit Information:
Screw Sizes: 3/8-16, 1/4-20
Attachable Cameras: All

Notes, Tips & Tricks:
If pairing Grad Jib with HPX-600, you will need sandbags to support the additional weight.
Arri Shoulder Mount

Kit ID: AS
Kit Contents:
• Arri Shoulder Mount

Reservable Item

Kit Information:
Screw Sizes: 3/8-16
Attachable Cameras: Arriflex S/B and M

Notes, Tips & Tricks:
• Not for use with video cameras.
• Specifically designed for M & S/B cameras and has a start/stop switch that works only with those cameras.
• Do not use the start/stop switch with any other film camera.

Above: Shoulder mount without a camera on it.

Above: Warning, the shoulder mount has the tendency to cause angst and/or passion in DPs, as seen above.
**Kit ID: PL1 & PL2**

**Kit Contents:**
- Lisand Head
- Lisand Plate
- Lisand Spreader
- Lisand Sticks

**Notes, Tips & Tricks:**
- Feet are very pointy and will ruin a hard wood floor. Put carpet squares or something else under them to protect your location.
- Use caution when locking the plate in place, sometimes it is difficult to fully lock.
- Screws do not attach to the plate and fall out easily, DO NOT LOSE THEM!

**Kit Information:**

- **Ball Size:** 100mm
- **Height:** 39” - 60”
- **Weight Capability:** 30 lbs.
- **Screw Sizes:** 1/4-20, 3/8-16 (Non Included)
- **Attachable Cameras:** ZR900, PD-150, DVX100, HVX200
- **Number of Stages:** 2

**Right:** The tripod itself has sharp feet which are not the best for hard wood floors and things that can get scratched.

**Far Right:** The Lisand Tripods have the second best head the school has. Behind the Cartoni C 20 S.
Losmandy Porta-Jib

**Kit ID:** JIB  
**Kit Contents:**
- 2.5 lb. Jib Weight
- 2.5 lb. Jib Weight
- 2.5 lb. Jib Weight
- 2.5 lb. Jib Weight
- 5 lb. Jib Weight
- 5 lb. Jib Weight
- 5 lb. Jib Weight
- 5 lb. Jib Weight
- Collar
- Collar
- Collar
- Female Weight Rod
- Instructions
- Jib
- Jib Case
- Jib Legs
- Jib Legs Case
- Jib Locking Pin
- Jib Tuning Weight
- Jib Weights Case
- Large Male Weight Rod
- PlateMate Weights
- PlateMate Weights
- PlateMate Weights
- PlateMate Weights
- Small Male Weight Rod
- Tightening Handle

**Kit Information:**
- **Ball Size:** 100mm
- **Height:** 24” - 84”
- **Weight Capability:** 35 lbs.
- **Screw Sizes:** See Bogen 3066 (pg. )
- **Attachable Cameras:** All Cameras compatible with Bogen 3066 head  
  - Bogen 510 head and Peter Lisand head.
- **Number of Stages:** 3 (2 on legs plus jib)

**Notes, Tips & Tricks:**
- This can be a great tool for adding movement to your film, but you can also lose fingers to it if you don't know how to use it properly. Ask Checkout for proper instruction.
- Do not raise center column of tripod.
- Threads get stripped easily, use caution when tightening locking knobs.
- Last locking knob must be removed to properly pack the jib.
- ALWAYS balance the jib, never use it when one side is heavier than the other, because it is much more difficult to control, and thus more dangerous.

**Below:** All the cases for the Jib. The red cooler is full of weights.

**Above:** The Jib built up. Notice that it is weighted evenly on both sides.

**Reservable Item Certification Req.**
Bogen 3063 & Bogen 510

Kit ID: BO1 & BO2
Kit Contents:
Head
Plate
Sticks

Bogen 3063 Manfrotto Tripod

Kit Information:
- Ball Size: 75mm
- Height: 33” - 59”
- Weight Capability: 22 lbs.
- Screw Sizes: 3/8-16
- Number of Stages: 2

Notes, Tips & Tricks:
- Plate is six sided - not your standard film plate.
- No spreaders, make sure you sandbag every leg.

Kit ID: 510
Kit Contents:
Head
Plate
Sticks
Spreader

Bogen 510 Tripod

Kit Information:
- Ball Size: 100mm
- Height: 35” - 59”
- Weight Capability: 18.7 lbs.
- Screw Sizes: 1/4-20, 3/8-16
- Attachable Cameras: All Cameras except Arriflex SR-Series and Sony 570 and 700.
- Number of Stages: 2

Notes, Tips & Tricks:
- Works with Bogen Rollers.
- Great for HVX 200.
- Attaches to the Losmandy Porta-Jib.
Miller-Cartoni Tripod

Kit ID: Miller Tripod
Kit Contents:
- Arm
- Head
- Plate
- Sticks
- Tie Down
- Petrol Case

Kit Information:
- Ball Size: 100mm
- Height: 8.7” - 73”
- Weight Capability: 22 lbs.
- Screw Sizes: 1/4-20
- Number of Stages: 4

Notes, Tips & Tricks:
- Watch out when trying to raise and lower legs, takes a while and is easier with two people.
- Do not overtighten legs.
- Case acts as a backpack for carrying.

Above: the head and plate. Note that the metal spikes can be extended or retracted.
Miller Tripod

Kit Information:
- Ball Size: 100mm
- Height: 2'7"-4'2"
- Weight Capability: 30 lbs.
- Screw Sizes: 1/4-20, 3/8-16
- Attachable Cameras: Arri M, Arri S/B, Scoopics

Kit Information:
- Ball Size: 150mm
- Weight Capacity: 65 lbs.
- Screw Sizes: 1/4-20
- Attachable Cameras: All)

Left: the feet for Sachtler #01. Note the spikes, which can cause damage to hardwood floors or other surfaces if not covered.
Sunpak Tripod

Sunpak 7001 DX Tripod

Kit Information:
Ball Size: N/A
Height: 22" - 60"
Weight Capability: 4.4 lbs.
Screw Sizes: 3/8-16
Attachable Cameras: Canon Elura, ZR900
Number of Stages: 3

Notes, Tips & Tricks:
• Do not use this tripod with any camera besides the Canon Elura and ZR900.

Kit IDs: CT1 - CT8
Kit Contents:
Sticks
Case
Plate
Plate

Reservable
Vinten Tripod

Kit ID: 1-3, 5, 6
Kit Contents:
Arm
Case
Sticks
Head
Plate
Spreaders

Vinten Vision 3 Tripod

Kit Information:
Ball Size: 75mm
Height: 21.4” - 66”
Weight Capability: 22 lbs.
Screw Sizes: 1/4-20, 3/8-16
Number of Stages: 3

Notes, Tips & Tricks:
• DSR-700 cannot be used on this tripod with large lenses attached.
• Fragile. Carbon fiber legs cost $450 apiece, so be careful.
• These are great tripods, but they are completely underused, especially with the smaller camera kits!

Above: the head and plate.
High Hat 1-3

Kit ID: HH1
Kit Contents:
High Hat #01

Kit Information:
Ball Size: 100mm
Attachable Heads: Bogen 3066, Bogen 510, Cartoni Alfa-II, Cartoni Beta, Cartoni C20S, Miller, Miller/Cartoni, O’Connor and Peter Lisand

Notes, Tips & Tricks:
• This high-hat’s legs can be detached from the board, and are slightly adjustable.

Above: High Hat one has legs that will move if you take it off the plywood board.

Kit ID: HH2
Kit Contents:
High Hat #02

Kit Information:
Ball Size: 100mm
Attachable Heads: Bogen 3066, Bogen 510, Cartoni Alfa-II, Cartoni Beta, Cartoni C20S, Miller, Miller/Cartoni, O’Connor and Peter Lisand

Notes, Tips & Tricks:
• This high-hat can be detached from the board, but its legs are static.

Above: High Hat two has fixed legs that will not move even if you take it off the plywood, do not remove from board.

Kit ID: HH3
Kit Contents:
High Hat #03

Kit Information:
Screw Size: 1/4-20
Attachable Cameras: DVX100, HVX200, A1U, V1U, PD-150, PD-170

Notes, Tips & Tricks:
• This tripod can be a little sticky, loosen the pan and tilt mechanisms as much as possible before using.
• Only works with video cameras, there is no way to switch screws.

Above: High Hat three has its own head that only uses 1/4 20 screw.
CAMERA SUPPORT

Ronford Baker Baby Legs

Kit ID: MBL
Kit Contents:
- Tripod Bowl
- Extending Stirrup 01
- Extending Stirrup 02
- Extending Stirrup 03
- Foot 01
- Foot 02
- Foot 03
- Stirrup 01
- Stirrup 02
- Stirrup 03

**Ronford-Baker Baby Legs**

**Kit Information:**
- Ball Size: 150mm
- Screw Sizes: n/a
- Head: Sachtler (separate)

**Notes, Tips & Tricks:**
- Used with Sachtler Head
EDITING

Special thanks to the broadcast TV stations of the late 50’s for 1/10 of a percent. Thanks for 29.97 and 23.98, we love those numbers.
Hard Drive Kit

**Kit IDs:** HD1 - HD7

**Kit Contents:**
- Pelican Case
- 75GB Hard Drive
- 6 to 6 Pin Firewire
- Power Cord
- Power Adapter

**Notes, Tips & Tricks:**
- Can only be checked out for 2 weeks at a time.
- Make sure that everything is turned off while plugging into power. Plug in firewire first, then turn on computer and drive.
- Approximately 80GB drives.
- Reformat drive before returning drive to checkout
- THIS IS NOT A PERMANENT SOLUTION TO STUDENT STORAGE.

Above: Hard drive kits are a good stop gap if something happens to your hard drive, but they are not a permanent solution.

Rewind Board

**Kit ID:** FRB

**Kit Contents:**
- Film Rewind Board

**Notes, Tips & Tricks:**
- Helpful if you want to break a 400’ mag into daylight spools or to change A to B wind. If you do this, you will need a room that is completely light-tight. Ask the photo department about using a darkroom.

Above: The Film Rewind board is really helpful when you are trying to break a 400 foot load into daylight cores
Rewind Board & Reels

**Split Reel**

**Notes, Tips & Tricks:**
- Use with projector or rewind board.
- Plastic cores are available at checkout and cost 25 cents.

**Projection Reel**

**Notes, Tips & Tricks:**
- Use with projector or rewind board.

---

Above: This is a split reel that has been unscrewed to show how it comes apart.

Above: A projection reel that you put film on before you run it through the projector.
Tape Decks

Sony DSR-11 Deck

Notes, Tips & Tricks:
• Make sure that everything is turned off while plugging into power. Plug in firewire first, then turn on computer and deck.
• Use this to capture DV and DVCAM footage - NEVER a camera.
• Make sure the door stays closed when not inserting or removing a tape.
• The doors are fragile, and cost approximately $85.

Right: The front latch should always be closed when not using the DSR-11. It stops dust from getting into the mechanism. It breaks easily is also a very expensive piece so be careful with it.

Non-Reservable
Kit ID: DSR, Grad DSR
Kit Contents:
DSR-11
4 to 6 Pin Firewire
Case
Power Cord
Power Supply
Remote

Sony M15U Deck

Notes, Tips & Tricks:
• Make sure that everything is turned off while plugging into power. Plug in firewire first, then turn on computer and deck.
• Use this to capture DV, DVCAM and HDV (except Canon’s 24f HDV or JVC’s HDV Codecs) footage, not a camera.
• Be aware of menu settings regarding format. Check out a manual or ask at Checkout if you are unsure.
• There is only one of these available; check it out only if you are capturing HDV footage.

Non-Reservable
Kit ID: M15U
Kit Contents:
Sony M15U
4 to 6 Pin Firewire
Case
Power Cord
Power Supply
Remote

Above: The M15U is a newer version of the DSR-11 that can handle HDV footage. Make sure that you need this deck before you take it.
Blu-Ray Burner

Kit ID: Blu-Ray Burner (BR)
Kit Contents:
- Case
- Firewire 800 Cable
- Mercury Pro Optical Blu-Ray Player
- Power Cable
- USB 3.0 Cable

Wacom Intuos Pro

Kit ID: Wacom Tablet
Kit Contents:
- Soft Case
- Intuos Pro Tablet
- USB Cable
- Pen Stand
- Pen
- Pen Case
- Nib Removal Tool
- Instructions
Most grip equipment is known by multiple names. A beadboard holder is also known as a duckbill, platypus, quaker and billy grip. Each set may have a different name for the same pieces of equipment. Become familiar with these terms as quickly as you can.

When returning grip equipment that may have been exposed to water, always ask Checkout for a rag and can of WD-40 to wipe it down. Wipe down entirety of equipment, especially moving parts.
Kit ID: 6x6 Flag Kit
Kit Contents:
- Corner Frame x4
- Double Net x2
- Ear Clamp x2
- (F) Frame Half x4
- Flag
- Grid Cloth
- Lolipop x2
- (M) Frame Half x4
- Quick Reverse Baby Pin
- Riser Combo Stand x2
- Silk
- Single Net
- Soft Case
- Stuff Sack - Double x2
- Stuff Sack - Flag
- Stuff Sack - Grid Cloth
- Stuff Sack - Silk
- Stuff Sack - Single

Non-Reservable Certification Req.
6x6 Flag Kit (Cont.)
# Big Blue Grip Kit

**Kit ID:** BBGK  
**Kit Contents:**
- 18in. x 24in. Double
- 18in. x 24in. Flag Frame x4
- 18in. x 24in. Silk
- 18in. x 24in. Single
- 18in. x 24in. Solid x2
- 2 Riser Low Boy Combo Stand
- 20in. C-Stand
- 20lb. Sand Bag x6
- 20lb. Shot Bag x6
- 24in. x 36in. Double
- 24in. x 36in. Flag Frame x2
- 24in. x 36in. Silk
- 24in. x 36in. Single
- 24in. x 36in. Solid x2
- 3 Riser Combo Stand x2
- 35lb. Sand Bag x6
- 40in. C-Stand x6
- 4ft x 4ft Double
- 4ft x 4ft Floppie x2
- 4ft x 4ft Reflector Board x2
- 4ft x 4ft Silk
- 4ft x 4ft Single
- 4in. C-Clamp with 5/8in. Pin x2
- 6 Step Ladder
- 6ft x 2ft Cutte
- 6ft. x 6ft. Double Scrim
- 6ft. x 6ft. Frame Ear
- 6ft. x 6ft. Frame Side x4
- 6ft. x 6ft. Silk
- 6ft. x 6ft. Single Scrim
- 6in. C-Clamp
- 6in. C-Clamp with 5/8in. Pin x2
- Baby Nail On Plate x4
- Baby Pipe Clamp
- Bead Board Holder x2
- Chain Vise Grips x2
- Chain Vise Grips with 5/8in. Pin x2
- Dual Stud for Space Clamp x3
- Full Apple Box x2
- Full Crate x4
- Furniture Clamp x2
- Gator Grip
- Grip Clip x10
- Half Apple Box x2
- Half Crate 1 (H1)
- Half Crate 2 (H2)
- Junior Nail On Plate x2
- Junior Pipe Clamp
- Lollipop x2
- Lowell Interlink x3
- Mafer Clamp x2
- Mafer Clamp Adapter x2
- Magic Finger
- Pancake x2
- Quarter Apple Box x2
- Ratchet Strap x4
- Scissor Mount x3
- Space Clamp x3
- Super Duz All Cart
- Tent Stake x6

**Below:** The Super Duz All cart, or taco cart, holds almost all the grip gear you will need. You must have a U-Haul or similar enclosed trailer to use this kit.

**Non-Reservable Certification Req.**

**Above:** 18in. x 24in. Single Net, Singles are denoted by the green fabric around the edge, a single cuts down one stop of light.

**Above:** Bead Board Holder, makes clamping a bounce board to a C-Stand easy. This item has many different names, duckbills, platypus...

**Above:** The BBGK has two combo stand, one low boy combo stand (not pictured), six 40in. C-Stand and one 20in. C-Stand. The combo stand has a lollipop in it.
Notes, Tips & Tricks:

- You must rent a U-Haul and provide Checkout with proof that you have done so two days before your scheduled pickup.
- Get a printout of all equipment in the kit (or refer to these pages) to help keep track of all parts so that nothing gets left behind.
- When not using shinies on stands, make sure they are tabled. Shinies should always be heavily sandbagged.
- Always stake down and heavily sandbag 6x6 frames. If winds are too high, disassemble and do not use. Failure to do so could result in serious damage to equipment and crew members.
- No partial check-out is allowed, everything must be taken from Checkout, even if you only plan to use part of the kit.
- Be careful not to lose Mafer Clamp adapters - they are very small.
- DO NOT cut any of the rope provided - buy your own if you need different lengths.
- When returning the Big Blue Grip Kit to Checkout, you MUST arrive when Checkout opens - this kit is very large and every item must be hand-checked, it takes at least two hours to check in.
Grip Kit

**Reservable Item**

**Kit Contents:**
- 1000watt Dimmer
- 4in. C-Clamp with 5/8in. Pin
- Baby Nail On Plate x2
- Bounce Case
- Bounce Disk
- Cardellini Clamp
- Cube Tap
- Grip Clip (small) x4
- Grip Clip (medium) x1
- Grip Clip (large) x1
- Ground Lift
- Mafer Clamp x2
- Mafer Clamp Bolt x2
- Magic Finger
- Power Strip
- Outlet Tester
- Ratchet Strap x2
- Rope x2
- Scissor Clamp x2
- Stinger x2

**Notes, Tips & Tricks:**
- Pack smaller, more delicate items (scissor clamps) on top of heavier items, not vice-versa.
- DO NOT cut the ropes! If you need other lengths, buy your own. The ropes are standard lengths for a reason, and everyone needs to use them.

**Above:** All the clips and rope go in the one case, be careful with the scissor clamps, they can be bent, and if they bend too much and get broken, you have to replace them.

**Left:** Rope can be used for many things. Securing lights and frames outside is very important because a strong gust of wind can easily knock over a light if it has not been secured.

Before checking these kits out you should learn the bowline and the truckers hitch. Both knots will be very good to know on set.

**Above:** A properly packed Grip Kit
Notes, Tips & Tricks:
- The engraved number on the C-Stand must match the number on the gobo arm when returning stands.
- All knuckles should be tightened and facing the same direction when returned to Checkout.
- Understand what the “right-hand rule” is (as demonstrated above,) if you don’t, ask.
- If C-Stands are exposed to water (condensation, rain, snow) they must be wiped down with WD-40 so that they don’t rust.

Above: Right hand rule is very important when using a C-Stand. Make sure that when you set up a C-Stand that the knuckles are to the right.
# Road Rags Kits, Small & Large

</tbody>
</table>

## Notes, Tips & Tricks:

- When breaking down frames, completely remove pole gently before folding up - they have often been broken in the past and cost at least $75 to replace, depending on market value.
- Must be returned with all flags, silks and scrims folded neatly and tucked into their compartments.
- Can be hand-held, but otherwise require a C-Stand/Gobo Arm.

---

**Above:** The frames break easily if they are forced or not used properly. Some of the kits contain broken frames. Check the kit thoroughly when you check it out.

**Above:** A 18in. x 24in. Double Net set up on a C-Stand. This shows one of the many uses a C-Stand has on set.

**Above:** A 24in. x 36in. Solid and a 18in. x 24in. Silk, this shows the difference in sizes between the small and large kits.

**Below:** This is what the kit should look like when it is packed up. Then you should fold the top flap down to the velcro and then fold it into thirds.
Flex Drop Green Screen & Fog Machine

Reservable Item

Kit ID: Flex Drop Green Screen
Kit Contents:
- Green Screen
- Green Screen Stand

Notes, Tips & Tricks:
- Can be very difficult to fold back into its case. It’s probably easier to do so with two people.
- More stable with extra support, use sandbags on the base.

Left: The greenscreen side.

Right: The bluescreen side.

Reservable Item

Kit ID: FM
Kit Contents:
- Box
- Fog Machine

Notes, Tips & Tricks:
- The fog machine is great to create a little atmosphere, throw some light through it and look at the particles.

Fog Machine

Notes, Tips & Tricks:
- Fog juice does not come with machine - sold separately at Checkout.
- Clean before returning, you will be fined otherwise.
- If your location has particle smoke-detector, this machine will set it off - BE AWARE!
Impact Bounce & Lite Disc

**Reservable Item**

**Kit ID:** IB1 - IB6, B1 - B4  
**Kit Contents:**  
- Diffusion  
- Reflector  
- Case  

**Notes, Tips & Tricks:**  
- Know how to pack up disk, if you don't know, ask a Checkout worker to demonstrate.  
- Diameter 3’ 6”  
- The bounce has effectively 5 sides: silver, gold, partial gold, partial silver and white.

Above: The Impact bounce displaying a few of its sides. There are a total of 5.

**Reservable Item**

**Kit ID:** IB7  
**Kit Contents:**  
- Small Lite Disc  

**Notes, Tips & Tricks:**  
- Know how to pack up disk, if you don't know, ask a Checkout worker to demonstrate.  
- This bounce is very small. It is primarily intended for macro photography. Diameter: 1’ 11”

Above: LiteDisc Seven only has the diffusion or soft bounce, it is also much smaller than the other bounce disks.
Matthews Doorway Dolly

Notes, Tips & Tricks:
• If pneumatic wheels are removed to put on skate wheels, do not lose metal spacers on the front wheels.
• Do not over-tighten wheels or they will not roll.
• Track must be reserved separately.

Left: Use the tie down hook to secure your tripod to the dolly. This can be done with a ratchet strap.

Kit ID: DK1-DK2
Kit Contents:
Base
Stationary Handle
Turning Handle
Wing
Wing

Notes, Tips & Tricks:
• Never let skate wheels touch the ground.
• Use tarp or furniture pad to lay down under track in grassy areas.
• Use Pledge (oil-based lubrication) to lube tracks
• Level track vertically and horizontally.
Microdolly Basic Kit

**Kit Information:**
- **Weight Capability:** 100 lbs.
- **Attachable Tripods:**

**Notes, Tips & Tricks:**
- You must check out the travel case with this kit.
- The dolly should be pulled, not pushed.

**Kit ID:** Microdolly

**Kit Contents:**
- Cloth
- Handle
- Instruction Card
- Leg A
- Leg B
- Rope Ratchet
- Soft Case
- Styrofoam Track Thread A
- Styrofoam Track Thread B
- Track
- Track Bumper
- Wood Shims
- Wrench

Top: packed into it's case.
Right: the parts laid out.
Below Right: the dolly set up and demonstrated with a tripod. It is intended to be pulled, not pushed.

Right: Shims and other included accessories.
Apple Box Kit

Above: Apple boxes are one of the most useful things on set, from helping to level a dolly track to being a chair for someone on set.

Reservable Item

Kit ID: Apple Box Kit
Kit Contents:
Full Apple Box
Full Apple Box Door
Half Apple Box
Pancake Apple Box
Quarter Apple Box Door

Notes, Tips & Tricks:
• There are typically five sizes of Apple box: Full, Half, Eighth, Quarter and Pancake. Only the height varies between sizes. A full apple box is 1’8” long, 1’ wide and 8” tall, a half apple is 4” tall, etc. Pancakes vary in thickness but are generally around 1/4” - 1/2”.

Apple Boxes

Rope

Non-Reservable Item

Kit ID: Rope
Kit Contents:
Rope

Notes, Tips & Tricks:
• DO NOT cut the ropes! If you need other lengths, buy your own. The ropes are standard lengths for a reason, and everyone needs to use them.
• Rope can be used for many things. Securing lights and frames in windy conditions, for example.
• Learn the bowline and the truckers hitch. Both knots will be very good to know on set.
Sandbags

Notes, Tips & Tricks:
• There is a maximum 15 bag limit per production, depending on quantity available.
• There is a proper way to stack sandbags; each bag should be placed perpendicular to the last so that they interlock.
• Full sandbags should be about 20 lbs.
• Use them properly, the zippers can break easily.

Empty Sandbags

Notes, Tips & Tricks:
• When you fill them, put the rocks or sand in a ziplock before placing them in the bag. Empty and clean such bags before returning them.
• Full sandbags should be about 20 lbs.
• Use them properly, the zippers can break easily.

Above: Sandbags are also another very useful item. They help keep all your equipment safe. Always have a sandbag on a stand if there is a light on it, and use two of three if you have extras.
Gobo Arm

Kit ID: Gobo Arm
Kit Contents:
Gobo Arm

Cardellini Clamp

Space Clamp

Kit ID: Space Clamp
Kit Contents: Space Clamp

Notes, Tips & Tricks:
• The Space Clamp is a good tool to use to attach lights to beams and other objects that the C-Clamps aren't big enough to get around. However, try not to put a bunch of weight on them.

Dual-Stud for Space Clamp

Kit ID: Dual-Stud for Space Clamp
Kit Contents: Dual-Stud for Space Clamp
Walkie Talkies

Kit ID: Walkie Talkies
Kit Contents:
Two Walkie Talkies
Know the “West Virginia Law”: Watts = Volts x Amps. Most circuits are 120 volts and 15 to 20 amps. Check the lights for wattage ratings and calculate your amp load to make sure you are not plugging too many lights into one circuit.
**How to Easily Calculate the Conversion of Volts – Amps & Watts**

Basic electric theory states that:

**Volts** are a measure of the force or pressure under which electricity flows.

**Amps** are a measurement of the current flow rate of electrons.

**Watts** is a measurement of electrical power created. 1 watt is equal to one joule of energy per second.

For an example of how the conversion chart works, let's assume a solar panel rated at 60 Watts, 12 Volts and 5 Amps.

**Watts is Volts times Amps.** To use the chart, cover the \( W \) in the chart with a finger and use the remaining visible chart calculation of \( V \) multiplied by \( A \). Using our sample panel data, 12 Volts multiplied by 5 Amps equals 60 Watts.

**Volts is Watts divided by Amps.** To use the chart, cover up the \( V \) with your finger and use the remaining chart calculation of \( W \) divided by \( A \). Using our sample panel data, 60 watts divided 5 Amps equals 12 Volts.

**Amps is Watts divided by Volts.** To use the chart, cover up the \( A \) with your finger and use the remaining chart calculation of \( W \) divided by \( V \). Using our sample panel data, 60 watts divided by 12 volts equals 5 amps.

Originally by Rick Contrata, thanks Rick!

Dimmer Kit & Power Accessories

**Dimmer Kit**

**Notes, Tips & Tricks:**
- Pay attention to wattages on the dimmers. A 650w light WILL destroy a 600w dimmer.
- Very useful for dimming practicals, china balls and accent lighting.
- Be aware - color temperature decreases when light is dimmed, lights will be more orange.

**Kit ID:** DIM
**Kit Contents:**
- 1000w Dimmer
- 600w Dimmer
- 600w Dimmer
- Dimmer Kit Case

**Non-Reservable**

**Kit ID:** Power Accessories
**Kit Contents:**
- Single Extension Cords

**Notes, Tips & Tricks:**
- Reserve single extensions and other items if you don’t need an entire extension cord package.

**Above:** A single stinger.
**Above:** When running many small lights, power strips are useful.
**Above:** 3-Way stingers usually can’t handle as many amps as regular stingers.
**Above:** Ground Lifts and Cube taps are helpful for adapting or adding additional outlets.
Below: Extension cord kits are a must for every shoot with some lights. Most senior films will use two of them. If one stops working please mark it and tell us.

**Extension Cord Kit**

**Notes, Tips & Tricks:**
- Check to make sure that the kit number on the cords and crate match when packing.
- Remove tape (that may have been used to secure cords to the floor, wall, etc.) when returning, otherwise they get sticky and difficult to wrap and unwrap.
- Coil all of the cords so that they are approximately the same size and fit neatly into the crate.
- Ground lifts are used to plug a grounded edison plug into a non-grounded socket. Do not remove grounded ends on extension cords!

**Reservable Item**

**Kit ID:** EX1-EX9  
**Kit Contents:**
- 3-Way Stinger  
- Box  
- Crate  
- Cube Tap  
- Cube Tap  
- Ground Lift  
- Ground Lift  
- Ground Lift  
- Ground Lift  
- Ground Lift  
- Power Strip  
- Short Stinger  
- Stinger  
- Stinger  
- Stinger  
- Stinger  
- Socket Tester
Light Pole & Single Light Stands

**Light (Extension) Pole**

**Notes, Tips & Tricks:**
- Extends from 2’10” to 5’2”
- Can be checked out in addition to other light kits as a supplement.

Right: Light poles are great for putting a china ball off the end of a C-Stand and extending it further out than would normally be possible with just a C-Stand arm.

**Single Light Stands**

**Notes, Tips & Tricks:**
- Necessary for some kits, make sure you check one out with:
  - Arri Kit, Type 3 (1)
  - Arri Kit, Type 4 (1)
  - HMI Kit (1)
  - Lowel SGK (2)
  - Lowel Pro Kit (2)
  - Ambi Kit (1)
  - L-light Kit (1)
  - Single Broad Lights
  - Single Scoop Lights
- Only available if required for one of the above kits, not as a supplement to otherwise complete kits such as the Arri Lighting Kits or Mole Combo Kits.

Above: Extra light stands are great to have around, and some lighting kits don’t come with stands or with enough stands for every light in it. Make sure you know how many you need.
LIGHTING KITS

If a lamp burns out, bring it back to checkout. You will not be charged for the lamp if you bring it back; you will be charged if you do not.

Use gloves to replace the blown lamp with the correct spare lamp from the kit. Oil from your bare fingers can cause the lamp to overheat and explode.

Make sure lights are turned off before plugging them in.

Know the “West Virginia Law”: Watts = Volts x Amps. Most circuits are 120 volts and 15 to 20 amps. Check the lights for wattage ratings and calculate your amp load to make sure you are not plugging too many lights into one circuit.

\[ W = VA \]

When using a dimmer, the color temperature will get increasingly warmer as the light is dimmed.

Allow lights to completely cool before packing them back into their kits.
Arri Kit (Type 1)

**Reservable Item**

**Kit IDs:** A1 - A2  
**Kit Contents:**  
1K Barn Doors

Grip Bag  
Lamp Box  
Light Stand  
Light Stand  
Light Stand  
Scissor Clamp  
Scrim Bag  
Work Gloves

Above: The lights included in the Type 1 Arri Kit.

**Kit Information:**  
**Number of Lights:** 4  
**Wattages and Codes:** 300w(FKW), 2 x 650w(FRK), 1000w(DXW)  
**Max Wattage of Kit:** 2600w  
**Number of Light Stands:** 4  
**Color Balance:** Tungsten (3200K)

**Notes, Tips & Tricks:**  
- When using the Chimera Soft Box, make sure to leave the top flap open and the others loose to avoid causing the light to overheat and melt itself.  
- C-47’s no longer come with the kit, but sometimes they are left inside by other people.  
- Wrap power cords starting at the light to end of cord (see above photo.)  
- Pack lights face up.  
- If the case won’t close properly don’t force it, open it up and find out what is blocking it, usually a cord.
**LIGHTING KITS**

**Arri Kit (Type 2)**

Below: The Arri kit type two nicely packed up. The cables are all nicely wrapped.

![Image of Arri kit](image)

**Kit IDs:** A3 - A5

**Kit Contents:**
- 650 Barn Doors
- 650 Double Scrim
- 650 Open Face Light
- 650 Single Scrim
- 650 Barn Doors
- 300 Barn Doors
- 150 Barn Doors
- 650 Double Scrim
- 300 Double Scrim
- 150 Double Scrim
- Arri 300 Light
- Arri 150 Light
- Omni 500 Light
- 650 Single Scrim
- 300 Single Scrim
- 150 Single Scrim
- Case
- Chimera Adaptor Ring
- Chimera Shell
- Chimera Soft Box
- Chimera Large Silk
- Chimera Rods
- Chimera Rods
- Chimera Rods
- Chimera Small Silk
- Grip Bag
- Lamp Box
- Light Stand
- Light Stand
- Light Stand
- Scissor Clamp
- Scrim Bag
- Work Gloves

**Kit Information:**
- **Number of Lights:** 4
- **Wattages and Codes:** 1x Arri 150w, 1x Arri 300w, 1x Omni 500w, 1x Arri 650w.
- **Max Wattage of Kit:** 1600w
- **Number of Light Stands:** 4
- **Color Balance:** Tungsten (3200K)

**Notes, Tips & Tricks:**
- When using the Chimera Soft Box, make sure to leave the top flap open and the others loose to avoid causing the light to overheat and melt itself.
- Wrap coils from light to end of cord (see photo on opposite page.)
- Pack lights face up.
- If the case won't close properly don't force it, open it up and find out what is blocking it, usually a cord.
Broad & Scoop Lights

**Broad Lights**

**Kit Information:**
- Number of Lights: 1
- Wattages and Codes: 1000w(FHM)
- Max Wattage of Kit: 1000w
- Number of Light Stands: 0
- Color Balance: Tungsten (3200K)

**Notes, Tips & Tricks:**
- Does not come with a stand, you must request one.
- Throws light in one direction, very general.
- Barn doors can fall off easily, make sure you don’t lose them.

**Scoop Lights**

**Kit Information:**
- Number of Lights: 1
- Wattages and Codes: 1000w(FEL)
- Max Wattage of Kit: 1000w
- Number of Light Stands: 0
- Color Balance: Tungsten (3200K)

**Notes, Tips & Tricks:**
- Does not come with a stand, you must request one.
- Throws light in one direction, very general.

Below: The broad is a good source of general lighting, but it’s not the easiest light to control.

Above: The scoop is similar to the broad in that it is good for general lighting. The shape of the light source is the main difference between the two.
C-Clamp Tota Kit

Kit ID: CT1-CT2

Kit Contents:
Crate
Light
Light
Light

Kit Information:
Number of Lights: 3
Wattages and Codes: 1000w(FHM) x 3
Max Wattage of Kit: 3000w
Number of Light Stands: 0
Color Balance: Tungsten (3200K)

Notes, Tips & Tricks:
• VERY HOT & BRIGHT!
• Attach to a pipe or the thick part of a C-stand, don’t try to clamp them to the knuckle.
• Making a snoot out of black wrap will give greater control over light.
• Hot enough to melt gels. Do not attach gels directly to barn doors. Use a snoot and attach gel at least 3" from the fixture.

Left: All three lights with their barn doors open. These lights get hotter than any other light checkout has. Make sure you wear leather gloves when you touch them or you will burn yourself.
Cool Lux Kit

**Kit ID:** C1 & C2

**Kit Contents:**
- Barn Doors
- Barn Doors
- Barn Door Clamp
- Barn Door Clamp
- Barn Door Clamp
- Barn Door Clamp
- Light Clamp
- Light Clamp
- Metal Platform
- 30 watt Micro-Lux Candlepower Light
- 250 watt Mini-Cool MR-16 Light
- 250 Mini-Cool MR-16 Light
- Mounting Tube
- Mounting Tube
- Mounting Tube
- Power Cord
- Power Cord
- Screen
- Screen Frame
- Stand
- Stand
- Umbrella
- Dimmer
- Grip Clip
- Case

**Kit Information:**
- **Number of Lights:** 3
- **Wattages and Codes:** 2 x 250w(FOS), 150w(EKB)
- **Max Wattage of Kit:** 650w
- **Number of Light Stands:** 2
- **Color Balance:** Tungsten (3200K)

**Notes, Tips & Tricks:**
- The Cool Lux lights do not heat up as much as other lights. This can be useful when shooting extended interviews or other situations when subjects might be likely to sweat under hotter lights.
- Screw caps are plastic and will melt against the lights if left too close to them for too long.
- Light mount must be manually attached before each use.
- The 150w light has just a DC plug adapter. It can't be powered through wall outlets.
LIGHTING KITS

Kit ID: HMI1 & HMI2

Kit Contents:
- Power Cord
- Accessory Case
- Ballast
- Barn Doors
- Battery Belt
- Chimera Ring
- Chimera Softbox
- Extra Bulb
- Lenses
- Light
- Pelican Case
- Power Cord
- Light Stand

Kit Information:
- Number of Lights: 1
- Wattages and Codes: 200w (MSR 200 HR)
- Max Wattage of Kit: 200w
- Number of Light Stands: 1
- Color Balance: Daylight (5600K)

Notes, Tips & Tricks:
- Needs light stand.
- Do NOT charge the battery through the ballast; the power cable is in the battery pack.
- These lights are Daylight (5600K) balanced, not Tungsten.

Above: accessories, including lenses, power cords, ballast, spare lamps, battery belt, chimera case, barn doors and chimera adapter ring.

Above: battery belt. Should not be plugged into wall outlet while it is being used to power light.

Left: The kit packed correctly.
### LIGHTING KITS

#### Kino-Flo Kits

**Reservable Item**

<td>Twist-On Mount</td>
</tr>
</tbody>
</table>

**Kit Information:**

- **Number of Lights:** 4
- **Wattages and Codes:** 45w (Daylight Kino) x 4
- **Max Wattage of Kit:** 180w
- **Number of Light Stands:** 0 (Use C-Stands)
- **Color Balance:** Daylight (5600K) and Tungsten (3200K)

**Notes, Tips & Tricks:**

- Good, soft light - excellent in many situations.
- Tubes can be detached from shell and placed separately.
- Needs to be attached to a Matthews C-stand.
- The egg crates for the front of the light are very fragile.
- Use attached "hair-tie" cable ties to take the stress off of the cords.
- Turn lights off when switching between 2ft. and 4ft. throw.
- If you remove the tubes, make sure you replace them and connect them correctly (plug in ends are color-coded.)
- Cases are breaking and unreliable - SUPPORT THE BOTTOM WHEN CARRYING!

**Right:** The Kino is a great light for small spaces because it doesn’t get hot. Daylight Kino tubes have blue ends; tungsten tubes have orange ends.

**Right:** The ends of Daylight Kino tubes are blue, and the ends of Tungsten tubes are orange. They can be mixed and matched between fixtures, but make sure they are returned to their proper kits.

**Above:** The back of the Kino bank shell has a spot for a twist on mount and little things that look like hair ties. Run the cables for the kind through them to ease the strain on the cables.
LIGHTING KITS

iKan LEDs

Kit ID: iKan LED Lights
Kit Contents:
- AC Adapter x 2
- Barn Door x 2
- Battery Charger x 2
- Car Charge Adapter x 2
- Case
- Compact Light Stand x 2
- Frosted Panel x 2
- Light x 2
- Quick Start Guide
- Sony Battery x 4
- Ultra-Heavy Duty Camera Shoe
- Mount x 2

Kit Information:
- Number of Lights: 2
- Number of Light Stands: 2
- Color Temp: 3200-5600K
Lowel L-Light Kit

**Kit ID:** L1-L3  
**Kit Contents:**  
- Barn Doors  
- Barn Doors  
- Barn Doors  
- Case  
- Extension Cord  
- Extension Cord  
- Extension Cord  
- Light  
- Light  
- Light

**Top Right:** The L-Light is basically a light socket rated to 660 watts so you can put photo floods in it, and attach barn doors.

**Kit Information:**  
- **Number of Lights:** 3  
- **Wattages and Codes:** 3 x L-Light(40-500w Incandescent)  
- **Max Wattage of Kit:** 1500w  
- **Number of Light Stands:** 0  
- **Color Balance:** Tungsten (3200K)

**Notes, Tips & Tricks:**  
- No stands included in kit - ask for some.  
- Great for accent lighting.  
- Work well with dimmers.
LIGHTING KITS

Mickey Mole Kit

Below: The Mickey Mole kit is a great kit for raising overall because of its sheer wattage and output.

Kit ID: MM

Kit Contents:
- Barn Door Crate
- Barn Door Extension
- Barn Door Extension
- Barn Door Extension
- Barn Door Extension
- Barn Doors
- Barn Doors
- Barn Doors
- Barn Doors
- Grad. Scrim
- Light
- Light
- Light
- Light
- Light Case
- Light Stand
- Light Stand
- Light Stand
- Scrim
- Stands Case

Kit Information:

Number of Lights: 4
Wattages and Codes: 4 x 1000w (FBY)
Max Wattage of Kit: 4000w
Number of Light Stands: 4
Color Balance: Tungsten (3200K)

Notes, Tips & Tricks:
- Lot of output in kit - good for large space lighting and outdoors at night.
- Pack lights face down.
- Legs on stands don't lock, be careful.

Left: All three cases that come with the Mickey Mole kit.

Above: A Mickey Mole light on a stand.
**Mole Combo Kit**

**Kit Information:**
- **Number of Lights:** 3
- **Wattages and Codes:** 2 x 650 (FRK), 1 650(FAD) Soft Light
- **Max Wattage of Kit:** 1950w
- **Number of Light Stands:** 3

**Notes, Tips & Tricks:**
- Softbox does not produce a lot of light.
- Mole lights are packed on their sides with cables coiled neatly and placed on top (see picture.)
- Good general lighting kit for any type of project.

**Kit Contents:**

**Reservable Item**

**Kit IDs:** MC1 - MC5

*Below:* All the scrims and scrim bags that go with the Mole Combo kit.

*Above:* The three lights that come in the Mole Combo kit.

*Above:* The Mole Combo kit nicely put away in its case.
Arri Max Kit

**Kit ID:** Arri Max Kit

**Kit Contents:**
1K Barn Door x3
1K Double Scrim x3
1K Gel Frame x3
1K Single Scrim x3
3-Way 14-Gauge Blue Stinger
Ari Max #1 Lamp Box
Glove Bag
Gloves
Hard Case
Light 1K x3
Light Stand x3
Light Stand Mount x3
Lock Handle x3
Scrim Bag

**Kit Information:**
- **Number of Lights:** 3
- **Wattages and Codes:** 3 x 1000w (FBY)
- **Max Wattage of Kit:** 4000w
- **Number of Light Stands:** 3
- **Color Balance:** Tungsten (3200K)

**Notes, Tips & Tricks:**
- Use blue stinger to run two 1Ks off of one stinger.
- Know your circuits! 15 Amp. breaker will not hold two 1Ks but 20 Amp. will.
- Use gloves to take out lamps.

---

**Below:** All the contents of the Max Kit.

**Above:** A 1000 on a stand.

**Left:** All three lights packed nicely in one case.
Arri Mini Kit

**Kit IDs:** Arri Mini

**Kit Contents:**
- 150 Barn Door x2
- 150 Double Scrim x2
- 150 Gel Frame x2
- 150 Single Scrim x2
- 300 Barn Door x2
- 300 Double Scrim x2
- 300 Gel Frame x2
- 300 Single Scrim x2
- Gloves
- Hard Case
- Light 150 x2
- Light 300 x2
- Light Stand x4
- Scissor Clip
- Scrim Bag

**Reservable Item**

**Kit Information:**
- **Number of Lights:** 4
- **Wattages and Codes:** 2 x 150w, 2 x 300w
- **Max Wattage of Kit:** 900w
- **Number of Light Stands:** 4

**Notes, Tips & Tricks:**
- This is a nice kit for an interview setup. However, as there is no lightbox in the kit, an additional flag kit is recommended.
Digital Projectors

Kit ID: DP
Kit Contents:
Projector
Case
Remote
Power Cable
C-Clamp Board, Duffel Bags & Red Coolers

**Reservable Item**

Kit ID: CBoard

Kit Contents:
C-Clamp Board

Notes, Tips & Tricks:
- This board could be used for many things. It is drilled so that a high hat can be attached to it. It can then be attached to a pipe.
- It can be used to hang a camera or projector from the grid in Studio B.

Above: C-Clamp board is used to mount a camera to the grid in Studio B.

**Reservable Item**

Kit ID: Duffel

Kit Contents:
Duffel Bag

Notes, Tips & Tricks:
- Great for consolidating and keeping track of small items such as sound gear.

Above: Duffel bags are great for keeping track of a lot of small items.

**Non-Reservable**

Kit ID: Red Coolers

Kit Contents:
Red Cooler

Above: Coolers are intended for use by craft services.
Field Safety Kit & Fire Extinguisher

Reservable Item

Kit ID: FS
Kit Contents:
- Duffel Bag
- First Aid Kit
- Safety Vest x10
- Tarp
- Fire Extinguisher
- Walkie Talkies

Notes, Tips & Tricks:
- Great for outdoor locations near traffic and the general public.

Reservable Item

Kit ID: Fire Extinguisher
Kit Contents:
- Fire Extinguisher

Notes, Tips & Tricks:
- Emergency item that can save your (insert noun here). Important if you expect to be dealing with anything combustible, even if the script doesn’t call for fire.

Below: The field safety kit is a good thing to have if you are shooting near a road or all night outside.

Below: If something in your script calls for a fire, please check this out too.
16mm Film Projectors

Reservable Item

Kit ID: 16mm Projector

Kit Contents:
- Projector
- Lens

Notes, Tips & Tricks:
- Film Checkout has several 16mm projectors of various models.
SOUND ACCESSORIES
**SOUND ACCESSORIES**

**Boom Poles & Stereo Array Bar**

**Kit IDs:** BP1 - BP12  
BP1 & BP2  
WBP1 & WBP2  

**Kit Contents:** Boom Poles

**Notes, Tips & Tricks:**
- Some have internal cables.  
- They come in varying sizes. If you know what kind of space you will be shooting in, ask at Checkout for an appropriate boom and they will attempt to accommodate you.  
- Do not pull cord on wired boom poles. If it does not close all the way, open and close it starting at the bottom.  
- Do not close the boom all the way, leave about an inch between segments.

![Boom Poles](image)

Above: Boom poles come in different sizes, evaluate your script and see what you need. Boom pole #11 (top in the photo) is really long.

**Reservable Item**

**Kit IDs:** 1-6  

**Kit Contents:** Stereo Array Bar

**Notes, Tips & Tricks:**
- Used to record SFX in a stereo array.  
- You need a microphone stand or a boom pole with an adapter to set up.  
- All sound effects should be recorded in stereo.

![Stereo Array Bar](image)

Above: Use these and two microphones to record sound effects in stereo.
SOUND ACCESSORIES

Microphone Stands

Non-Reservable

Kit IDs: DS1 - DS5
Kit Contents:
Desk Mic Stands

Left: Desk Microphone stand. Great for doing some ADR off a table.

Non-Reservable

Kit IDs: FS1-FS3, FS5-FS6
Kit Contents:
• Floor Mic Stands

Notes, Tips & Tricks:
• You may want to check out a sandbag with the floor microphone stand, depending on which microphone you are using.

Above: The floor microphone stand is great for doing ADR and other things when you don’t have a table for a desk microphone stand.

Boom Basket to Mic Stand Adapter

Notes, Tips & Tricks:
• You can use this to attach a microphone that is held by a boom basket or shock mount to a microphone stand.
Mic Pop Filter & Parabolic Mic Holder

**Reservable Item**

**Kit ID:** Mic Pop Filter  
**Kit Contents:**  
Pop Filter

**Notes, Tips & Tricks:**  
- Used to reduce applosives ("p" sounds) and other breath noises when recording voices.

Above: The microphone pop filter is great for stopping unwanted breath noise.

**Reservable Item**

**Kit ID:** PR  
**Kit Contents:**  
Parabolic Reflector  
Case

**Notes, Tips & Tricks:**  
- Used to capture sounds at a great distance.  
- Very directional.  
- You must reserve a (cardioid) microphone separately.  
- Has a 3/8-16 mount on the bottom so it can be attached to a tripod.

Above: The Parabolic reflector is great for spotting events and doc shoots when you are unable to get close to the action of whatever is going on.
Headphones

Above: These headphones are good for general listening to something on the computer.

![Headphones Image]

**Reservable Item**

**Kit IDs:** 1 - 10
**Kit Contents:**
Sony MDR-7506
Bag

**Notes, Tips & Tricks:**
- Do not use for accurate sound mixing, but good for general editing.
- When wrapping cables to return, do not wrap the cord around the headphones. Cord should return wrapped in the method demonstrated in the photo.

Above: These headphones are great all around and are better than the Sennheiser’s for mixing audio on the computers in the NLE.

![Headphones Image]

**Reservable Item**

**Kit IDs:** 1 - 15
**Kit Contents:**
Sennheiser HD-201
Sony MDR-7506
Bag

**Notes, Tips & Tricks:**
- Flat response, great for mixing.
- When wrapping cables to return, do not wrap the cord around the headphones, just dangle the cord into the bag and put the headphones on top of it.
- Make sure the bag number matches the headphone number.
Boom Pole Holder

Kit ID: Boom Pole Holder

Kit Contents:
Boom Pole Holder

Notes, Tips & Tricks:
- Fits on C-Stands and Mic Stands
- Holds Boom Pole In Fixed Position
- Hands Free Operation
- Coated To Protect Your Boompole
- Extra-Wide Yoke Permits Easy Positioning
- No Clamping Jaws to Stress Your Boompole
- Reduces Operator Fatigue

Non- Reservable Item
“Dynamic” means that the microphone requires no additional power.

“Condenser” means that the microphone requires power (Phantom or Battery) and is slightly more fragile.

Having a “cardioid” pickup pattern means that a microphone picks up more sound information in front of it than behind it or beside it.

Having a “super (or hyper) cardioid” pattern means that a microphone is more directional and picks up much more information in front of it than behind it or beside it. “Shotgun” or “boom” microphones are super cardioid.

Having an “omni” pickup pattern means that the microphone will pick up sound fairly equally in all directions.

DO NOT use a battery when a microphone is already connected to phantom power.

A super/hyper cardioid pickup pattern. (Shotgun)

An omni-directional pickup pattern

A cardioid pickup pattern.
**Cardioid**

**Electro-Voice RE-15**

**Notes, Tips & Tricks:**
- Cardioid Dynamic Microphone
- For sound effects recording and vocals.

**Kit IDs:** RE-15 #1-RE-15 #5

**Kit Contents:**
- RE-15 Mic
- Case

**Reservable Item**

**Electro-Voice RE-16**

**Notes, Tips & Tricks:**
- Super-Cardioid Dynamic Microphone
- For sound effects recording and vocals.

**Kit IDs:** RE-16 #1 - RE-16 #2

**Kit Contents:**
- RE-16 Mic
- Case

**Reservable Item**

**Nady CM-90**

**Notes, Tips & Tricks:**
- Cardioid Condenser Microphone
- Good for recording sound effects and instruments.

**Kit IDs:** Nady1-Nady4

**Kit Contents:**
- Nady CM-90
- Case

**Reservable Item**

**Reservable Item**
Cardioid

Rode NT3

Notes, Tips & Tricks:
- Cardioid Polar Response Condenser Microphone
- Great for sound effects, vocals and instruments.

Kit IDs: Rode1 - Rode2
Kit Contents:
- Rode NT3
- Case
- Mic Holder

AKG D190E

Notes, Tips & Tricks:
- Cardioid Dynamic Microphone
- Great for sound effects recording or for handheld vocals.

Kit IDs: AKG
Kit Contents:
- AKG D190E
- Case

Audio Technica ATM 31a

Notes, Tips & Tricks:
- Cardioid Condenser Microphone
- Useful for sound effects recording or for handheld vocals.
SOUND MICROPHONES

Omni-Directional

**Sure SM58**

**Kit IDs:** SM58 #1 - SM58 #2  
**Kit Contents:**  
Sure SM58  
Case

**Notes, Tips & Tricks:**  
• Omni-Directional Dynamic Microphone  
• Good for vocals and all purpose recording.

**Reservable Item**

**Electro-Voice RE-50**

**Kit IDs:** RE-50 #1 - RE-50#2  
**Kit Contents:**  
ATM 31a  
Case

**Notes, Tips & Tricks:**  
• Omni-Directional Dynamic Microphone  
• Good for handheld vocals or to capture room ambience.
Wireless LAV Kit

Kit ID: WL1 - WL3
Kit Contents:
- Omni Lav Microphone
- Wireless Transmitter
- Wireless Receiver
- Wireless Antenna
- Wireless Antenna
- Receiver Case

Kit Information:
Wireless Lav: Audio-Technica MT830c, Sennheiser G3’s.

Notes, Tips & Tricks:
- Range is short, approximately 20 meters for the AT, and 100+ meters for the Sennheisers.

Left: the receiver, transmitter and lavaliere microphone.

Above: Sennheiser Accessories
Cardioid/Wired Lav Kit

Notes, Tips & Tricks:
- Variable Condenser Microphone
- Cardioid mic has a larger pickup pattern than most shotguns (less directional.)
- Good for quiet, indoor locations.
- These two mics are some of the highest quality in our arsenal. Especially the Neumann KM-150. They are more difficult to use, as they will pick up any unwanted noise, but if the conditions are right they will prove the best option.
- They are also a good option for foley work.

Kit IDs: CM1-CM2
Kit Contents:
- CK91/Numann KM-150
- Case
- Power Supply (for KM-150)
- Shock Mount
- Wind Sock
- Zeplin
- Long XLR
- XLR Splitter
- Wired Lav
Sennheiser 816

Notes, Tips & Tricks:
- Super-Cardioid Condenser Microphone
- Very directional, good for noisy locations.
- Must use phantom power.

Kit IDs: 816
Kit Contents:
- Brush
- Case
- 816 Microphone
- Rycote Modular Windshield System
- Short XLR Cable
- Windjammer

Above: The 816 with the Rycote open so you can see the microphone.

Sennheiser ME-67

Notes, Tips & Tricks:
- Lobar (Hypercardioid) Condenser Microphone
- Very directional, good for noisy locations.

Kit IDs: ME-67
Kit Contents:
- Case
- MZH 70-1 Windscreen
- MZS 20-1 Shock Mount
- Microphone

Above: The ME-67, pictured here without its windscreen, is our second longest shotgun.
Stereo Mic Kit

Kit ID: SM-1

Kit Contents:
CK 91: Microphone Capsule
CK 91: Microphone Capsule
Microphone Power
Microphone Power
A91 Joint
A91 Joint
CK 94: Figure-8 Capsule
Rycote Zeppelin
Rycote Softie
XLR Cable
XLR Cable
Pelican Case
Stereo Array Bar

Kit Information:
Microphones: AKG CK 98, 2x AKG CK 91.

Notes, Tips & Tricks:
• The CK 94: Figure-8 capsule is perfect for two-person interviews or scenes. The pattern allows you to put the microphone between the two, and keep it there. But make sure you are on the correct axis.
• The stereo mic set (2x CK 91 capsules) is great for ambient sounds or foley. The blimp isn't quite as useful as the stereo bar (not pictured), but is good when a microphone stand isn't easily available.
• The best way to create a stereo pair is to get the microphones as close as possible by tilting them 45 degrees toward each other. A good example is the stereo array on the Zoom recorder.
Sound Kit

Kit ID: S1 - S18

Kit Contents:
- Shotgun Capsule
- Shotgun Power
- Rycote Softie
- Boom Basket
- Boom Pole
- Wired Lav Power*
- Wired Lav Mic*
- Wireless Mic
- Wireless Transmitter x2
- Wireless Receiver x2
- Shure FP24 Mixer*
- Headphones
- 1/4" Adapter
- 25' XLR Cable
- XLR Extension x2
- XLR Splitter x2
- Duplex Cable
- Mini(M) to XLR(F)
- Mini(M) to XLR(M) x2
- Mini to Mini x2
- Mixer Portabrace Case*
- Pelican Case
- Silica Gel

Reservable Item

- Pelican Case

Notes, Tips & Tricks:
- This recorder does timecode.

Kit Information:
Format: DAT Tape
SOUND RECORDERS & MIXERS

Mackie Mixer & Nagra 3

Above: The Mackie Mixer is good for a shoot in a studio.

Mackie Mixer & Nagra 3

Kit Information:
Mixer or Recorder: Mixer
Channels In: 8
Channels Out: 1(2)

Notes, Tips & Tricks:
• Great for studio mixing, not so great on location because it is so big. Good for situations with multiple microphones.

Kit IDs: 1-2
Kit Contents:
Mackie Mixer

Reservable Item

Kit Information:
Mixer or Recorder: Recorder
Channels In: 2

Notes, Tips & Tricks:
• Uses 1/4” Magnetic tape - an analog recorder, not digital.
• Requires 9 D-cell batteries.
• Very heavy.

Kit Information:
Mixer or Recorder: Mixer
Channels In: 8
Channels Out: 1(2)

Reservable Item

Kit IDs: Nagra
Kit Contents:
Nagra 3
Case
Power Supply
Counter

Nagra 3
Sound Devices 302

Kit Information:
Mixer or Recorder: Mixer  
Channels In: 3 XLR-in  
Channels Out: 2 XLR-out

Notes, Tips & Tricks:
• Can go between a digital camera and microphone so that the recorded camera sound is already in sync and of higher quality.  
• Make sure small switches are set appropriately for your recording purpose. (Consult manual.)  
• Takes three AA batteries.  
• Checking out a manual is recommended. Theo Lipfert is also a good source of information.  
• The pre-amps in the SD 302 are MUCH nicer than those in the 702 or 722. You get a better recording if you mix into the 302, and then record into the 702 via a line input.

Kit IDs: SDM 1 - SDM 3
Kit Contents:
Sound Devices 302  
1/4in. to 1/8in. Adapter  
Case

Reservable Item

Above: Take advantage of this mixer's preamps (better quality than the cameras) and full meter L.E.D.

Above: The 302 has two out puts, great for running into a camera.

Above: The 302 has three inputs so you can mix down to two.
Kit IDs: HDR 1 - HDR 6

Kit Contents:
1/8in. to 1/4in. Adapter
Body
CF Card
CF Case
CF Reader
Case
Power Supply
TA3-F to XLR-M
TA3-F to XLR-M
USB 2.0 Cable

Right: The hard disc has two inputs.

Above Right: The case for the 722 is very well padded and holds the recorder in place well, please keep it in the case as much as possible.

Kit Information:
Mixer or Recorder: Recorder
Channels In: 2

Notes, Tips & Tricks:
• Records to a device-internal hard drive and then transfers via 6-pin firewire to a computer, or, preferrably, via enclosed compact flash reader.
• Use the compact flash reader to transfer data - the firewire ports are continually being damaged by attachment in an incorrect order.
• 722 Can record to both hard drive and compact flash simultaneously.
• If connecting to computer with firewire, make sure all power is off when connecting firewire, then turn on computer and recorder.
• Will take any Sony L-Series battery.
• We have both the SD 722 and 702. Functionally these two recorders are exactly the same, except that the 722 also allows the used to record to an 80GB internal Hard Drive. This is extremely good for back-up!

Right: accessories, including power cord, C-link cable, USB cable, CF reader, 1/8" - 1/4" adapter and XLR - XL-2 adapters.
Zoom H4N

Above: The Zoom H4N has a stereo pair microphones, which are perfect for ambiance recording.

Left: The Zoom also has two XLR inputs... although gain cannot be controlled separately.

Reservable Item

Kit IDs: Zoom1-Zoom6

Kit Contents
- Zoom Recorder
- SD card
- SD card case
- Green Zoom case
- Hand Hold handle
- Instruction Manual
- Power Supply
- Card Reader
- Card Reader USB cable

Kit Information:
- **Mixer or Recorder:** Recorder
- **Channels In:** 2

Notes, Tips, $ Tricks:
- Records four tracks to an SD card.
- Offers the option to record to two XLR inputs and or a stereo pair attached to the top.
- The gain for the XLR inputs cannot be controlled separately!
- Every time a the SD card is cleaned, the files are renamned, which means that several files have the same name. It is best to batch change the file names each time the card is dumped.
- Do no attempt to use phantom power, it will kill your batteries immediately!
EXPENDABLES

- DVCAM Tape
- Sony HDV Tape
- Panasonic MiniDV Tape
- Sony MiniDV Tape
- A Variety of CD/DVD Cases
- Chip Chart
- Incandescent Bulb (Various Wattages)
- Lens Blower (Red Rocket)
- Photoflood Daylight Balanced Bulb

MICRO SD CARD: 40.00
STUDIO B

Features studio lighting grid and green screen

A projector screen and rolling TV cart are available for presentations and film screenings.
The lightboard is the controller of all the lights on the grid, also allowing you to set custom settings, cues, and dim the lights.

Triple section Cyclorama (Cyc) light.

1000w Scoop Lights

1000w Rolling Soflights

5k, 2k, and 1k Fresnel lights
Cabinet B: Green Kino-Flos

Reservable Item

Above: Four ft. 4-bank kino-flo with green bulbs used for green screen lighting.

Kit Information:
Number of Bulbs: 4
Wattages and Codes: 4 x 75w Fluorescent
Max Wattage of Kit: 300w
Number of Light Stands: 1 Riser Combo Stand

Notes, Tips & Tricks:
• Cardellini clamp (NRI) use is ideal for vertical setup. Junior pin use is ideal for horizontal setup.
• Meant to be used for green screen use only.
• SUPPORT THE WEIGHT OF THE KIT WHEN CARRYING, the lights themselves should be picked up by at least two people especially during setup.

Kit ID: Studio B Cabinet B

Kit Contents:
Barn Doors
Bank Shell
Egg Crate Louver
Junior Pin
Riser Combo Stand
Safety Cable
Yoke/Handle

Below: Four ft. 4-bank kino-flo on riser combo stand using cardellini clamp for vertical setup.

Cabinet A:
Stingers, Sandbags, adapters, and barndoors

Below Four ft. 4-bank kino-flo on riser combo stand using junior pin for horizontal setup.
Studio B Grip Closet

Non-Reservable Item

Kit ID: Grip Closet

Kit Contents:
- 1in Square Frame Ear
- 24in. x 18in. Double Net x2
- 24in. x 18in. Flag
- 24in. x 18in. Silk
- 24in. x 18in. Single Net
