GENERAL INFO

Policy information that people should know but often miss in the Checkout Agreement:

How many weeks in advance can you reserve equipment?:

Freshmen - one week.	1st Year Graduate - two weeks
Sophomores - two weeks.	2nd Year Graduate - four weeks
Juniors - three weeks.	3rd Year + Graduate - three weeks
Seniors - four weeks.	

Equipment Quantity Limits:

- C-Stands: 6
- Arri Lighting Kits: 1
- Kinos: 2
- Track(Straight/Curved): 3/2
- Scoops/Broads: 2 Total
- Extension Kits: 2
- C-Clamp Totas: 1
- Flag Kits: 2
- Sandbags: 15
- Light Discs: 1
- Light Meters: 1

Checkout Hours:

(Early-Semester) Monday - Friday: 8am - 5pm

©2008 Montana State University

*Thanks to Tiffen and Lee Filters for their excellent filter descriptions.

COMMON SENSE

Before diving into all of the more technical information about equipment, there are a few important “common sense” concerns that all students should take into account when preparing for and undertaking a shoot using Checkout’s gear.

- Read and understand your Checkout Agreement to avoid breaking policies and/or accruing fines.
- Do not leave equipment in a car, garage or other cold place overnight. NEVER EVER leave anything electronic! If you do leave items such as C-Stands or Dolly Tracks in cold temperatures, condensation will form when they warm up which will rust the metal - you MUST wipe down these items with WD-40 to prevent this.
- When pulling any cable from a socket, pull from the end of the cable - not the cord - this will prevent the cord from weakening and eventually breaking.
- If you are unsure about the proper use of any piece of equipment, or have a problem during a shoot, do not hesitate to call Checkout: (406)994-6254. Consult *before* you act, not after!
- If equipment gets “stuck,” don’t force it, consult Checkout.
- If equipment - God forbid - breaks during your shoot, call Checkout as soon as possible so that work can begin on a solution to the problem as soon as possible.
- Do not leave gear unattended, keep track of everything you check out at all times.
- Return cables neatly wrapped and batteries fully charged.

BATTERIES

BATTERIES

Non-Reservable

The batteries shown here are rechargeable and provided by Checkout. Any non-rechargeable batteries (AA, etc) will not be provided.

Do not drop batteries, all of them are worth at least \$100 apiece and break easily when dropped.

BATTERIES

4-Pin Battery Belt

Kit Information:

Volts: 12v

Charge Time: 10 - 12 hrs.

Notes, Tips & Tricks

- Used to power Arri S/B, Arri M, Arri SR Series, Aaton XTR and Video Tap. (12 volt devices)
- Never plug into equipment while attached to AC (wall) power.
- Make sure that you have a cable that will adapt 4-pin output to your device.

5-Pin Battery Belt

Kit Information:

Volts: 12v

Charge Time: 10 - 12 hrs.

Notes, Tips & Tricks

- Used to power Arri S/B, Arri M, Arri SR Series, Aaton XTR and Video Tap. (12 volt devices)
- Never plug into equipment while attached to AC (wall) power.
- Make sure that you have a cable that will adapt 5-pin output to your device.

Canon S-12 Internal Battery

Kit Information:

Volts: 12v

Charge Time: 4 - 6 hrs.

Notes, Tips & Tricks

- Used to power Canon Scoopic (Internal.)
- Make sure you check that these batteries hold a charge before leaving checkout, as many of them are old.
- DO NOT check these batteries with a voltmeter, it will burn them out.

BATTERIES

Eco-Charge DAT Battery

Kit Information:

Volts: 6v

Charge Time: 4 - 5 hrs.

Notes, Tips & Tricks

- Used to power Tascam DAT Recorders.

Hard Disc Recorder Battery

Kit Information:

Volts: 7.4v

Charge Time: 4 - 5 hrs.

Notes, Tips & Tricks

- Used to power Sound Devices 722 and 702 Hard Disc Recorders.

Panasonic Large Battery

Kit Information:

Volts: 7.2v

Charge Time: 4 - 5 hrs.

Notes, Tips & Tricks

- Used to power Panasonic HVX-200, and Panasonic DVX-100

BATTERIES

Panasonic Medium Battery

Kit Information:

Volts: 7.2v

Charge Time: 3 - 4 hrs.

Notes, Tips & Tricks

- Used to power Panasonic HVX-200, and Panasonic DVX-100

Scoopic External Battery

Kit Information:

Volts: 12v

Charge Time: 8 - 10 hrs.

Notes, Tips & Tricks

- Used to power any 12-volt device, including Canon Scoopics and Aaton XTR.

Sony L-Series Large Battery

Kit Information:

Volts: 12v

Charge Time: 4 - 5 hrs.

Notes, Tips & Tricks

- Used to power Sony PD-150, PD-170, HVR-V1U and HVR Z1U. Can also power the Sound Devices 722 and 702 recorders.

BATTERIES

Sony L-Series Small Battery

Kit Information:

Volts: 7.2v

Charge Time: 3 - 4 hrs.

Notes, Tips & Tricks

- Used to power Sony PD-150, PD-170, HVR-V1U and HVR Z1U. Can also power the Sound Devices 722 and 702 recorders.

Sony V-Mount Battery

Kit Information:

Volts:

Charge Time:

Notes, Tips & Tricks

- Used to power Sony DSR-250, DSR-570, HDW-700 and Monitors.

CABLES

Non-Reservable

DO

DO NOT

These two cables do not fit together! Look carefully at the ends before connecting cables and never force anything. If they do not seem to fit, do not connect them.

CABLES

4 to 6 Pin Firewire 400

Common Uses:

- Deck to computer connection. Plug into deck first, computer should not be turned on until after firewire is attached.

6 to 6 Pin Firewire 400

Common Uses:

- Hard drive connection to computer.

4 to 4 Pin Firewire 400

Common Uses:

- Connection of camera to other 4-pin device.

Firewire 800

Common Uses:

- Hard drive connection to computer - faster than Firewire

eSATA Cable

Common Uses:

- Really fast (3GB/s) connection.
- Work on specific lab computers.

Single RCA Cable

Common Uses:

- Audio or video connection - all purpose.

Double RCA Cable

Common Uses:

- Generally used for audio connection, but could also be

Triple RCA Cable

Common Uses:

- Audio and video connection - all purpose. Could double as a component cable in a pinch, but might produce inferior images under such circumstances.

1/8in. TRS to Double RCA Cable

Common Uses:

- Audio connection - device to receiver (ex. iPod to mixer.)

1/8in TRS to Triple RCA Cable

Common Uses:

- Audio and video source to RCA receiver. (ex. Camera to

CABLES

4 to 4 Pin Power Cable

Common Uses:

- Used to adapt power for 12 volt devices from a battery belt. Make sure you know how many pins the belt and device have so that you get the correct cable.

4 to 5 Pin Power Cable

Common Uses:

- Used to adapt power for 12 volt devices from a battery belt. Make sure you know how many pins the belt and device have so that you get the correct cable.

3 Pin IEC Power Cable

Common Uses:

- Most common power connector, used for computers,

BNC Cable

Common Uses:

- Video and audio connection.

Special Notes:

- 75 ohm.
- They vary in length, get the size you need.

Component Video Cable

Common Uses:

- For higher quality (professional, HD) video sources, essentially the same as a three way RCA cord, but meant to transfer red-green-blue information instead of audio-video.

DVI Cable

Common Uses:

- Connection of (Mac) computers to monitors.

DVI to HDMI Cable

Common Uses:

- Connection of (Mac) computers to digital TV or projector.

HDMI Cable

Common Uses:

- Connection of HD sources.
Can now also transmit audio on

S-Video Cable

Common Uses:

- Video connection - slightly higher quality than single RCA video connection because red, green, blue and luminance channels are separated onto individual pins.

VGA to Component Cable

Common Uses:

- Connection of (Windows) computer to video receiver.
Cannot convert analog signal to digital.

CABLES

VHF "F" Coaxial Cable

Common Uses:

- Television connection. The ends can be adapted to act as many different types of cable.

Ethernet Cable

Common Uses:

- Internet/Network connection.

Mini USB-B to USB Cable

Common Uses:

- Connection of various devices to a computer.

USB Extension Cable

Common Uses:

- Extending the reach of USB connections to various devices.
- Only actually fits Apple USB.

USB 2.0 Cable

Common Uses:

- Printer connection, HVX dump drive to computer (included in HVX kit), hard drive connection.
- Speed equivalent to firewire 400 if attached to USB 2.0 capable port.

CABLES

Duplex Cable

Common Uses:

- Running sound signal from boom microphone to recorder and from recorder to operator's headphones simultaneously.

1/4in. Male to 1/4in. Female

Common Uses:

- 1/4" headphone extension for on-set sound.
- Most commonly used with DAT recorder.

1/4in. Cable

Common Uses:

- 1/4" audio device connection.

1/8in. Cable

Common Uses:

- Audio source to audio input. (ex. Laptop to auxillary, iPod to whatever.)

XLR Cable

Common Uses:

- Connection of microphones to audio recording devices. Lengths vary.

CABLES

1/4in. Male to XLR Female

1/8in. Male to XLR Female

RCA Male to XLR Female

1/8in. Male to XLR Female

1/4in. Male to XLR Male

RCA Male to XLR Male

Power Adapter Cable for Mac Book Pro Laptop

Common Uses:

- Adapting AC power to charge Mac laptops.

OTHER CABLES

- Mono 1/4in.-M Cable
- Mono 1/4in.-M to 1/4in.-F Cable
- Mono 1/4in.-M to RCA-M
- RCA Coaxial Cable
- Stereo 1/4in.-M to Two Mono 1/4in.-M Cable
- Stereo 1/4in.-M to Two RCA-M Cable

(These Cables are also available upon request.)

CAMERAS

NEVER use a video camera as a deck. It wears out the head and would eventually make the camera unusable.

All lenses should be returned with aperture wide open.

Turn cameras off before changing the tape.

Cameras usually come with a UV filter attached to protect the lens. Make sure it is there when you pick up the camera. If you take it off, put it back on before you return the camera.

Do not leave the tripod plate attached to the camera when returning.

CAMERAS

Arriflex M

Kit Information:

Aspect Ratio: 1.33:1 (4:3)

Lenses: Angenieux 12-120mm - T2.1 (Takes 72mm Filters)

Lens Mount: Arri Standard Bayonet

Accessories: 72mm Filters, Intervalometer, Arri Shoulder Mount

Tripods to Use: Cartoni C 20 S Tripod

Bogen 3066

Bogen 3066 Baby Legs

Bogen 510

Necessary Tripod Screw Size: 3/8-16"

Format: 16mm, B-wind - Single or Double perf.

Kit Weight: 14.5

Notes, Tips & Tricks:

- Attach *only one* lens at a time!
- This camera does not take daylight spools.
- When you put in a new motor, watch for the notch near the bottom that allows the motor to slide fully into the camera body.
- Be careful not to misplace the cap that comes off of the camera body when attaching a mag to the camera.
- Each of the the three turret mounts on the front of the camera has a cap as well. Don't lose these, either.
- Similar to the Arriflex S/B.
- Can be ramped with variable-speed motor.
- Must be loaded in changing bag or absolute darkness.
- Compatible with 4 1/2 Filter Set. (Pg. 51)

Top Right: The Arri M Kit includes 4 Magazines.

Bottom Right: The Arri M kit comes with only one lens, the Angenieux 12-120mm zoom, which takes 72mm filters.

Left: The Arri M requires a 3-pin power cable. This can be adapted to 4 or 5 pins with appropriate cable (included in kit.).

Notes, Tips & Tricks:

- Attach *only one* lens at a time!
- When you put in a new motor, watch for the notch near the bottom that allows the motor to slide fully into the camera body.
- Don't misplace the cap that comes off when you attach a mag onto the body.
- The turret mounts on the front of the camera each has a cap, don't lose these either.
- When using the 400ft mag, the eyepiece is difficult to look through.
- Make sure to set the film in the gate and then set the claw before closing the pressure plate.
- Once the film is threaded through the rollers, make sure they are pressed against the film, this will keep the film registered within the sprocket holes.
- This camera can be used with daylight spools.
- Similar to the Arriflex M.
- Compatible with 4 1/2 Filter Set. (Pg. 51)

Kit Information:

Aspect Ratio: 1.33:1 (4:3), 1.85:1(16:9)

Lenses: (Built-in) 2.6 - 96.2mm

Frame Rate: 29.97 (NTSC)

Frame Resolution:

Tripods to Use: Cartoni Alfa-II

Sunpak

Necessary Tripod Screw Size: 1/4-20"

Format: MiniDV

CCD Size:

Kit Weight: 2.0 lbs.

Notes, Tips & Tricks:

- Use Panasonic tapes only, buy one from Checkout.
- Batteries will not necessarily come charged, be prepared to charge the batteries. Please bring them back charged.
- This camera has a plastic thread to mount it onto a tripod. These threads are easily stripped if the metal lock washer is not present and the camera is over-tightened. Be careful. NEVER lift the tripod by the camera.

Panasonic DVX100

Reservable Item

Kit ID: DVX

Kit Contents:

Battery Charger
Camera Body
Camera Pelican Case
Power Adapter
Power Cord
Silica Gel Packs

Left: DVX-100 and its accessories

Kit Information:

Aspect Ratio: 1.33:1 (4:3), 1.85:1(16:9) - Letterbox

Lenses: Built-in Variable: 4.5 - 45mm

Tripods to Use: Cartoni Alfa-II, Peter Lisand Tripod

Necessary Tripod Screw Size: 1/4-20"

Format: MiniDV - NTSC, 30p, 24p, 24p (Adv.)

CCD Size: 1/3" CCD

Kit Weight: 15.5 lbs.

Notes, Tips & Tricks:

- Do not lose XLR caps.
- Use Panasonic tapes only, buy one from Checkout.
- To learn more about the DVX's capabilities, check out the DVX user's manual (available at Checkout.)

Above: All camera packages come with a silica gel pack to keep the case and contents free of moisture.

Above: The lens and some of the controls on the left side of the DVX-100.

CAMERAS

Panasonic HVX200 HD

Reservable Item

Kit IDs: HVX 3 & 4

Kit Contents:

Battery Charger
Camera Body
Component Cable
Lens Cap
P2 Card 1
P2 Card 2
P2 Store Manual
Pelican Case
Power Adapter
Power Cord
Remote Control
Silica Gel Pack
USB 2.0 Cable

Right: The HVX-200 with all its accessories.

Kit Information:

Aspect Ratio: 1.33:1(4:3), 1.85:1(16:9)

Lens: Fixed 4.2 to 55mm

Frame Rate: 24p, 24pa, 30p or 60i

Frame Resolution: 480i, 720p or 1080i

Record Medium: 8GB P2 Cards, Mini DV Tape (Panasonic)

Tripods to Use: Cartoni Alfa II

Bogen 3066, Miller Cartoni, Vinten

Bogen 3066 Baby Legs

Peter Lisand

Bogen 510

Necessary Tripod Screw Size: 1/4-20"

Format: HD P2 Cards, Mini DV

CCD Size: 1/3" 3XCCD

Kit Weight:

Above: The dump drive, stores up to 60GB of footage. Each of the HVX-200 HD kits come with two P2 storage cards. It must be on a stable, level surface while dumping or it may lose footage!

Notes, Tips & Tricks:

- Use only Panasonic DV tapes.
- Do not lose XLR covers.
- Always have P2 cards in the case, camera or dump drive.
- Battery mounts are fragile and expensive, be careful.
- Component cable connection is fragile and finicky, must be supported.
- For more information about the functionality of the HVX, check out the HVX user's manual (available at Checkout.)
- Contains two built-in ND filters, 1/8 = 1 stop, 1/64 = 2 stops.
- If you feel resistance when changing focal length manually, the servo is engaged, flip the switch on the side of the camera from A (Auto) to M (Manual.)

CAMERAS

Sony DSR-250

Reservable Item

Kit ID: 1A & 2A

Kit Contents:

On-Camera Mic
Polarizing Filter
Portabrace Case
Portabrace Raincover
Camera Body
Tripod Plate
Viewfinder
Wide-Angle Converter

Top: Camera body and fixed lens.

Bottom: Tripod plate, on-board microphone and wide angle adapter.

Kit Information:

Aspect Ratio(s): 4:3

Lenses: Built-in 6mm - 72mm

Accessories: Varizoom Control

Diopters

Doubler

Tripods to Use:

3066

C20

Miller

Beta Cartoni

Beta Cartoni

Necessary Tripod Screw Size: 3/8-16

Formats: DVCAM, MiniDV

CCD Size:

Kit Weight: 22.0 lbs.

Notes, Tips & Tricks:

- Has one XLR input on front for on-board and two in back for microphone input. There is a switch to change from one to the other, make sure that you have switched it to the correct channel when recording audio.

CAMERAS

Kit Information:

Aspect Ratio(s): 16:9, 4:3

Lenses: SD Lenses. 15x, 20x, 36x

Lens Mount: 2/3" Bayonet

Accessories: Varizoom Control

Tripods to Use: Miller

O'Connor (with 36X)

EFP/Sachtler (with 36X)

3066

C20

Vinten

Necessary Tripod Screw Size: 16

Formats: DVCAM, MiniDV

CCD Size:

Kit Weight: 24.0 lbs

Notes, Tips & Tricks:

- If using the 36x lens, you must use the EFP/Sachtler or O'Connor Tripod.
- Watch the gain switch, it is easy to switch on accidentally. You can set each gain option to zero.
- Black balance before asking why it isn't working; this is often the problem.
- Timecode in and out points must be set.
- Takes large DVCAM tapes in addition to MiniDV.

Sony HDW-700

Reservable Item

Kit ID: HDA & HDB

Kit Contents:

On-Camera Mic
Plate VCT-U14
Battery Charger Cable
Kata Raincover
Camera Body
Battery Charger
Hard Case
Viewfinder

Kit Information:

Aspect Ratio(s): 16:9, 4:3

Lenses: HD Lenses.

Lens Mount: 2/3" Bayonet

Accessories: Varizoom Control

Tripods to Use: EFP/Sachtler

O'Connor

3066

C20

Necessary Tripod Screw Size: 3/8 16

Formats: HDCAM-1080i

CCD Size: 2/3 inch

Kit Weight: 53.0 lbs.

Notes, Tips & Tricks:

- If using the 36x lens, you MUST use the Ronford-Baker/Sachtler tripod.
- Back focus needs to be reset every time the camera is turned on or off or moved from a hot to cold environment.
- There are two different menus. (Ask?)
- The 36x lens requires two people during attachment: one to hold the lens up and the other to screw in the support.
- The 700 with the 36X HD lens and battery weighs 32 pounds! Take into account when choosing a tripod!

The HDW-700 on the Sachtler/Ronford-Baker tripod.

CAMERA ACCESSORIES

METERS: Analog/Digital Light Meter

Kit IDs: Analog Meter: 1 - 3

Kit Contents:

Analog Light Meter
Light Meter Case

Reservable Item

Analog Light Meter

Notes, Tips & Tricks:

- Make sure you know whether or not the high slide is in when metering.
- Do not lose the high slide, it is small and sometimes loose.
- Do not remove the incident bulb.

Above: The analogue light meter and case. All meters have rotating heads and protective slides for outdoor/bright-light metering.

Right: Checkout has more than one kind of digital light meter, make sure you know how to use the one you get.

Digital Light Meter

Notes, Tips & Tricks:

- Cases easily come open, make sure you properly secure the light meter.
- Has both spot and incident capability, just slide the bulb.
- Check out a manual if you don't know how to use a digital light meter. As noted above, there are a few different types.

Reservable Item

Kit ID: Digital Light Meter 4-22

Kit Contents:

Digital Light Meter

CAMERA ACCESSORIES

METERS: Color Meter

Reservable Item

Kit ID: Color Meter

Kit Contents:

Minolta Color Meter

Color Meter Case

Minolta Color Meter

Notes, Tips & Tricks:

- Check out the manual if you are unsure how to operate the color temperature meter.
- Tungsten light measures at around 3200 degrees Kelvin and daylight measures at around 5600 degrees Kelvin.

Left: The color temperature meter is good for when you are trying to match a scene shot over two days or a longer period of time.

Changing Bag and Video Tap

Left: A film changing bag is one of the most important things to keep safe on a film shoot. If it gets ripped and someone does not notice, it could ruin your film before you even send it out to the lab.

Changing Bag

Notes, Tips & Tricks:

- There are only six of these. That means that there is only one to go with each film camera that needs one, the SR1, SR2-A, SR2-B, M, S1 and S2. If you get a Scoopic or the Bolex, you should use daylight spools as much as possible because there will not be a changing bag available for you to checkout.
- The S/B cameras take daylight spools, but can also use a 400 foot mag. That is why they are in the group listed above.
- Visually inspect changing bag for holes, tears, dust and dirt - the best to check for light leaks is to stick your head into the bag in a bright

Non-Reservable

Kit IDs: CB1 - CB6

Kit Contents:
Changing Bag

Changing Tent

Notes, Tips & Tricks:

- There are only two of these. . If you get a Scoopic or the Bolex, you should use daylight spools as much as possible because there will not be a changing bag/ tent available for you to checkout.
- The S/B cameras take daylight spools, but can also use a 400 foot mag. That is why they are in the group listed above.
- Visually inspect changing tent for holes, tears, dust and dirt - the best to check for light leaks is to stick your head into the bag in a bright area.

CAMERA ACCESSORIES

VHS Recorder and Changing Bag

Reservable Item

Kit IDs: VHS1-VHS2
Kit Contents:
Portable VHS Recorder
Case

Right: The front of the VHS recorder

Below: The Back of the VHS recorder

Notes, Tips & Tricks:

- Can be useful to record dailies from the video tap.
- Powered with 12-volt battery belt. (Make sure you get one with the correct number of pins, 4 or 5)
- Need four pin female adapter to whichever battery belt you get.

Reservable Item

Kit IDs: VT#1
Kit Contents:
Video Tap
Cable
Case

Video Tap

Notes, Tips & Tricks:

- If you tilt the video tap (dutch angle) it will also tilt the image on your monitor. It is essentially just a small camera that looks into the eyepiece.
- DO NOT attempt to charge the battery while powering the video tap. It will shock you and fry the video tap.
- If it shocks you, unplug everything and start over.

Above: Great for having the director or a script supervisor look at acting performance from a monitor rather than cram 6 people in a bathroom.

Intervalometer & Varizoom

Reservable Item

Kit ID: IN1 & IN2

Kit Contents:

- 4-Pin to 5-Pin Power Cable
- Box
- Motor
- Remote
- Remote Cable

Intervalometer

Kit Information:

Notes, Tips & Tricks:

- Only for the Arri M and the Arri S/B.
- Make sure you are running the film the way you want, there is a forward and reverse switch that is easy to flip.
- For information on additive speeds, see the manual.
- You should check out a set of ND filters with the intervalometer so you can correct for the slower shutter speed.
- See APPENDIX A for timelapse charts.
- You do not need to power the camera while using the intervalometer, only the intervalometer itself.

Top: The entire kit (without the box).

Middle: The remote is where you set the frames per second and which direction you want the camera to run.

Bottom: This is the motor that goes into the Arri S/B or M

Kit ID: #1 - #9

Kit Contents:

Varizoom Control

Reservable Item

Varizoom Control

Kit Information:

Compatible Cameras: Sony 150, Sony 170, Sony 250

Notes, Tips & Tricks:

- Used to mechanically control zoom speed.
- Attach the varizoom control to the tripod handle or hand hold it.

CAMERA ACCESSORIES

Rain Covers

Non-Reservable

CAMERA ACCESSORIES

Underwater Housings

**Reservable Item
Certification Req.**

Kit ID: UH5 for V₁U

Kit Contents:

Endeavor Underwater Housing
Bulkhead Screw
Bulkhead Screw Bolt
Dome Port
O-Ring Kit
Spare Dome Port
Spare Dome Port Case
Travel Case

Below: The Endeavor Housing is the only housing to feature a live viewfinder in the housing!

Above: Easy Iris Control at your fingertips! All controls are easily reached, even the menu.

Kit Information:

Compatible Camera: V₁U

Kit Weight: 51.5

Notes, Tips, and Tricks:

- This is the nicest of our underwater housing... It happens to be the only one with a live viewfinder.
- This only works with the Sony V₁U, a really nice HD camera.
- Whenever you use an underwater port, MAKE SURE that the O-rings are greased and in place.
- Do not store the housing with the O-rings in place, this puts unnecessary stress on the rings and can cause them to break... which is bad when you are underwater!

Kit Information:

Focal Length: 10.5 - 378mm
Aperature: f2.2 - f16
Filter Size: 127mm

CAMERA FILTERS

All filters must be returned clean - free of dust or fingerprints. Use a lens cleaning kit to clean filters.

When shooting tungsten film outside, use an 85 filter to correct to daylight (5600K)

When shooting daylight film inside, use an 80A filter to correct to tungsten (3200K)

CAMERA FILTERS

FILTERS: 3x3

<p>80A: Used for converting daylight film for use with 3200K lamps. <i>F-Stop Increase:</i> 2</p>		<p>85BN6: Used for converting type B film to daylight, with an ND .6. <i>F-Stop Increase:</i> 2 2/3</p>	
<p>85: Used to convert daylight (5600K) to tungsten (3200K) <i>F-Stop Increase:</i> 2/3</p>		<p>85N.3: Used for converting tungsten film for daylight, with a ND .3. <i>F-Stop Increase:</i> 1 2/3</p>	
<p>85 Polarizer: An 85 combined with a Polarizer, Used like an 85 with the advantage of a Polarizer. <i>F-Stop Increase:</i> 2 1/3</p>		<p>85N.6: Used for converting tungsten film for daylight, with a ND .6. <i>F-Stop Increase:</i> 2 2/3</p>	
<p>85B: Used for converting type B film to daylight. <i>F-Stop Increase:</i> 2/3</p>		<p>85N.9: Used for converting tungsten film for daylight, with a ND .9. <i>F-Stop Increase:</i> 3 1/3</p>	
<p>85BN3: Used for converting type B film to daylight, with an ND .3. <i>F-Stop Increase:</i> 1 2/3</p>		<p>85N1.2: Used for converting tungsten film for daylight, with a ND 1.2. <i>F-Stop Increase:</i> 4 1/3</p>	

CAMERA FILTERS

FILTERS: 3x3

CC05M:
Used for balancing against too much green.

F-Stop Increase:
None

Clear/Haze/UV:
Used for protecting the lens.

F-Stop Increase:
None

CC10M:
Used for balancing against too much green.

F-Stop Increase:
1/3

Double F3:
For creating a fog effect. The double fog filter is softer than the normal fog filter but affects contrast more.

CC20M:
Used for balancing against too much green.

F-Stop Increase:
1/2

FLB:
With Type A film, used to eliminate blue-green cast by fluorescent bulbs
F-Stop Increase:
1

CC30M:
Used for balancing against too much green.

F-Stop Increase:
2/3

FLD:
With daylight film, used to eliminate blue-green cast by fluorescent bulbs.
F-Stop Increase:
1

CC40M:
Used for balancing against too much green.

F-Stop Increase:
3/4

Graduated N.3:
Is half ND.3 and half clear with a smooth transition in between.

F-Stop Increase:
1

CAMERA FILTERS

FILTERS: 3x3

Graduated N.6:
Is half ND.6 and half clear with a smooth transition in between.

F-Stop Increase:
2

N.6:
Used for reduction of light without changing color value.

F-Stop Increase:
2

Graduated Sunset:
Is half orange and half clear with a smooth transition in between.

F-Stop Increase:
2

N1.5:
Used for reduction of light without changing color value.

F-Stop Increase:
5

Haze 2A:
Used to absorb almost all UV light, Absorbs more than a Haze 1.
F-Stop Increase:
None

Sky:
Decreases the "bluishness" during outdoor shooting.

F-Stop Increase:
1/10th

N.3:
Used for reduction of light without changing color value.

F-Stop Increase:
1

Softnet 3W:
Softens the image, rendering possible facial blemishes less noticeable.

F-stop Increase:
1/3 - 2/3

Star 3mm:
Gives light "halos" the impression of being star shaped.

F-Stop Increase:
None

CAMERA FILTERS

FILTERS: 72mm

80A:
Used for converting daylight film for use with 3200K lamps.
F-Stop Increase:
2

85:
Used for converting tungsten film for daylight balanced light sources.
F-Stop Increase:
2/3

81A:
Used for balancing daylight film to electronic flash.
F-Stop Increase:
1/3

85A:
Decreases the color temperature slightly more than an 85 filter.
F-Stop Increase:
2/3

81C:
Used to permit the use of clear flash lamps.
F-Stop Increase:
1/3

85B:
Used for converting type B film to daylight.
F-Stop Increase:
2/3

82A:
Used to help stop excessive red of morning or evening light.
F-Stop Increase:
1/3

85C:
Used for converting daylight in late afternoon when full 85 is too warm.
F-stop Increase:
2/3

82B:
Used the same as an 82A, but with cooler results.
F-Stop Increase:
2/3

85N.3:
Same as an 85 filter with an ND.3 on it.
F-Stop Increase:
1 2/3

CAMERA FILTERS

FILTERS: 72mm

85N.6:
Same as an 85 filter with an ND.6 on it.
F-Stop Increase:
2 2/3

Close-Up Lens:
Used for extreme close-up photography. A magnifying lens.
F-Stop Increase:
None

85N.9:
Same as an 85 filter with an ND.9 on it.
F-stop Increase:
3 2/3

FLB:
With Type A film, used to eliminate blue-green cast by fluorescent bulbs
F-Stop Increase:
1

CCA12:
Same as 85 filter, made by Canon.
F-Stop Increase:
2/3

FLD:
With daylight film, used to eliminate blue-green cast by fluorescent bulbs.
F-Stop Increase:
1

Circular Polarizer:
Polarizes light. Increases contrast and gets rid of reflections.
F-Stop Increase:
2

Green 11:
Used for B&W film. Provides pleasing flesh tones against the sky.
F-Stop Increase:
2

Graduated N.6:
Is half ND.6 and half clear with a smooth transition in between.
F-Stop Increase:
2

Haze:
Used for reducing blues by absorbing UV.
F-Stop Increase:
None

CAMERA FILTERS

FILTERS: 72mm

N.3:
Used for reduction of light without changing color value.
F-Stop Increase:
1

67 - 72 Step Up Ring:
Used to convert one filter size to the next.
F-Stop Increase:
None

N.6:
Used for reduction of light without changing color value.
F-Stop Increase:
2

Sky 1A:
Used for reducing blues and adding warmth
F-Stop Increase:
None

N.9:
Used for reduction of light without changing color value.
F-Stop Increase:
3

Skylight 1:
Absorbs UV light.
F-Stop Increase:
None

N1.2:
Used for reduction of light without changing color value.
F-Stop Increase:
2/3

Skylight 1B:
Absorbs UV light and adds warmth.
F-Stop Increase:
None

Red 25:
Used for B&W film. Can create dramatic sky effect.
F-Stop Increase:
3

CAMERA FILTERS

FILTERS: 4 1/2 Filter Set

Reservable Item

Kit IDs: 4 1/2 Filter Set

Kit Contents:

Case
4 1/2 Adapter Ring
Haze 2A Filter
Clear Round Filter
Double Fog Filter
Center Spot Filter
Split Diopter

Notes, Tips & Tricks:

- Can be attached to Scoopics.
- Can be attached to 72mm filter compatible lenses in Arri S/B and Arri M kits.
- Can also be attached to the Angenieux variable lens that comes with the Aaton XTR.

The split diopter and lens hood on a zoom lens.

CAMERA FILTERS

FILTERS: Series 9 Filter S

Reservable Item

Kit IDs: Series 9 Filter Set

Kit Contents:

Case
4 1/2 Adapter Ring
Haze 2A Filter
Clear Round Filter
Double Fog Filter
Center Spot Filter
Split Diopter

Notes, Tips & Tricks:

- Can be attached to Scoopics.
- Can be attached to 72mm filter compatible lenses in Arri S/B and Arri M kits.
- With included 58mm ring, can be attached to PD-150.

CAMERA SUPPORT

Common thread sizes: 1/4-20 (Small), 3/8-16(Big)

Be careful to keep track of and return plates and screws - do not leave them attached to the camera when returning.

Some cameras are too big for some tripods - make sure to check out a tripod that is approved for use with your camera package.

Return with arm locked down and Pan/Tilt loose. DO NOT leave the arm loose, or it may strip itself out.

Fluid heads can freeze, they MUST be kept in a warm place overnight.

CAMERA SUPPORT

Arri Shoulder Mount

Kit ID: AS

Kit Contents:

- Arri Shoulder Mount

Reservable Item

Above: Shoulder mount without a camera on it.

Above: Shoulder mount with a camera on it.

Kit Information:

Screw Sizes: 3/8-16

Attachable Cameras: Arriflex S/B and M

Notes, Tips & Tricks:

- Not for use with video cameras.
- Specifically designed for M & S/B cameras and has a start/stop switch that works only with those cameras.
- Do not use the start/stop switch with any other film camera.

CAMERA SUPPORT

Bogen 3066 Baby Legs

Reservable Item

Kit ID: BL 1 & 2

Kit Contents:

- Bogen Baby Legs
- Plate
- Head

Above: Head and plate of Bogen Baby Legs

Right: The Baby legs compared to the regular Bogen tripod.

Kit Information:

Ball Size: 100mm

Height: 19" - 26"

Weight Capability: 44 lbs.

Screw Sizes: 3/8-6, 1/4-20

Attachable Cameras: All Cameras except DSR-570s and HDW-700s with 36x lenses attached.

Number of Stages: 2

Notes, Tips & Tricks:

- Tripod screws are stowed under the plate. You must remove the plate to get to them.
- The Baby Legs' head is the same as the head for the full sticks, they are interchangeable. The 3066 head can also be used with the Losmandy Porta-Jib.
- Compatible with Bogen Rollers.
- Be careful with the locking levers on the legs, they can break off.

CAMERA SUPPORT

Bogen 3066 Tripod

Kit ID: BG 1-4

Kit Contents:

Bogen Sticks
Head
Plate
Spreader
Screws

Reservable Item

Below: The head of a Bogen 3066 is the same as the baby Bogen 3066

Above: Looking down at the level of a Bogen 3066

Kit Information:

Ball Size: 100mm

Height: 35" - 59"

Weight Capability: 44 lbs.

Screw Sizes: 3/8 - 16, 1/4 - 20

Attachable Cameras: All Cameras except DSR-570s and HDW-700s with 36x lenses attached.

Number of Stages: 2

Notes, Tips & Tricks:

- Tripod screws are stowed under the plate. You must remove the plate to get to them.
- The Losmandy Porta-Jib uses the 3066 head, so you will need to check out this tripod or the baby legs if you are planning to use the jib.
- Compatible with Bogen Rollers.
- Be careful with the locking levers on the legs, they can break off.

CAMERA SUPPORT

Bogen Rollers

Reservable Item

Kit ID: BR1 - BR4

Kit Contents:
Rollers

Left: Used to make almost any tripods into dolly's. Great for shooting in Studio B.

Notes, Tips & Tricks:

- The Bogen rollers allow easy movement of tripods on smooth surfaces such as the studio floor, however, do not use them outdoors or they will get gummed up.
- Compatible with: Bogen 3066 Tripod & Baby Legs, Cartoni C20 Tripod and Bogen Manfrotto Tripod.

Above: The bogen tripod on the rollers.

CAMERA SUPPORT

Bogen Manfrotto Tripod

Reservable Item

Kit ID: MF1 - MF7

Kit Contents:

503 Tripod Head
Spreader
Arm
Sticks
Plate
Case

Bogen Manfrotto Tripod

Kit Information:

Ball Size: N/A

Height: 7" - 70.1"

Weight Capability: 15.4 lbs.

Screw Sizes: 1/4-20

Attachable Cameras: A1U, V1U, Z1U, PD-170, PD-150, DVX100 and HVX200

Number of Stages: 3

Notes, Tips & Tricks:

- Only MF1 comes with a spreader.

Above: the foot. Note the metal end, which might damage a hardwood floor or other surface.

Top: the head and plate.

Right: The legs partially extended.

CAMERA SUPPORT

Cartoni Alfa-II Tripod

Below: The Cartoni Alfa set up, notice the padded rubber feet.

Reservable Item

Kit ID: C 1- C25

Kit Contents:

Bag
Plate
Cartoni Sticks

Kit Information:

Ball Size: 100mm

Height: 33" - 62"

Weight Capability: 22 lbs.

Screw Sizes: 1/4 - 20

Attachable Cameras: DVX100, HVX200, A1U, V1U, Z1U, ZR-900, Scoopic, PD-150 and PD-170,

Number of Stages: 2

Notes, Tips & Tricks:

- If the plate will not stay fully latched, don't panic, there is a small phillips screw that needs to be tightened on the right side of the head, check this before leaving with gear so that Checkout can fix it.
- The spring under the tripod plate often detaches from the lock lever. This will cause the plate to not latch correctly. Test this before leaving and notify Checkout so that it can be fixed.
- The feet can be removed, make sure that they are all present when checking tripod out and when returning tripod.
- When attaching the plate, insert the plate at an angle and then set it flat so that it clicks to lock. It will not slide in from the front or back.
- Read the opening page of the camera support section for additional, mandatory information about tripods.

Above: This is the proper way to attach the plate to the head, it snaps down - it does not slide in!

CAMERA SUPPORT

Cartoni Beta Tripod

Reservable Item

Kit ID: B1 - B2

Kit Contents:

Spreader
Arm
Head
Sticks
Plate
Case

Cartoni Beta Tripod

Kit Information:

Ball Size: 100mm

Height: 29" - 54"

Weight Capability: 32 lbs.

Screw Sizes: 1/4-20, 3/8-16

Attachable Cameras: A1U, V1U, Z1U, PD-170, PD-150,
DVX100, HVX200, Arri M, Arri S/B and Scoopics

Number of Stages: 2

Right: with sticks partially extended and case.

Below: the head and plate.

CAMERA SUPPORT

Cartoni C 20 S Tripod

Reservable Item

Kit ID: CA

Kit Contents:

Baby Legs
Baby Legs Case
Head
Head Case
Plate
Spreader
Tall Legs
Tall Legs Case
Tripod Foot
Tripod Foot
Tripod Foot

Kit Information:

Ball Size: 100mm

Height: 20" - 72"

Weight Capability: 61 lbs.

Screw Sizes: 3/8-16, 1/4-20

Attachable Cameras: All film Cameras

Number of Stages: 2 - 2

Notes, Tips & Tricks:

- Plate on tripod slides to balance camera so it is not front or back heavy. (Use dial on side.)
- Compatible with Bogen Rollers.
- Spreaders attach on bottom, feet must be removed to attach them. DO NOT LOSE THEM.

Left: The complete Cartoni C 20 S tripod kit. Has both a set of baby legs and regular legs.

Above: The head of the C 20 S tripod.

CAMERA SUPPORT

Glidecam & ABC Jib

Glidecam 4000 Pro

Kit Information:

Height: 20" - 26.5"

Weight Capability: 10 lbs.

Screw Sizes: 1/4-20, 3/8-16

Attachable Cameras: A1U, V1U, Z1U, PD-170

Notes, Tips & Tricks:

- Takes a long time to balance properly. Plan accordingly.

CAMERA SUPPORT

High Hat 1-3

Kit ID: HH1

Kit Contents:

High Hat #01

Reservable Item

Kit Information:

Ball Size: 100mm

Attachable Heads: Bogen 3066, Bogen 510, Cartoni Alfa-II, Cartoni Beta, Cartoni C20S, Miller, Miller/Cartoni, O'Connor and Peter Lisand

Notes, Tips & Tricks:

- This high-hat's legs can be detached from the board, and are slightly adjustable.

Above: High Hat one has legs that will move if you take it off the plywood board.

Above: High Hat two has fixed legs that will not move even if you take it off the plywood, do not remove from board.

Kit ID: HH2

Kit Contents:

High Hat #02

Reservable Item

Kit Information:

Ball Size: 100mm

Attachable Heads: Bogen 3066, Bogen 510, Cartoni Alfa-II, Cartoni Beta, Cartoni C20S, Miller, Miller/Cartoni, O'Connor and Peter Lisand

Notes, Tips & Tricks:

- This high-hat can be detached from the board, but its legs are static.

Kit ID: HH3

Kit Contents:

High Hat #03

Reservable Item

Kit Information:

Screw Size: 1/4-20

Attachable Cameras: DVX100, HVX200, A1U, V1U, PD-150, PD-170

Notes, Tips & Tricks:

- This tripod can be a little sticky, loosen the pan and tilt mechanisms as much as possible before using.
- Only works with video cameras, there is no way to switch screws.

Above: High Hat three has its own head that only uses 1/4 20 screw.

CAMERA SUPPORT

Peter Lisand Tripod

Reservable Item

Kit ID: PL1 & PL2

Kit Contents:

Lisand Head
Lisand Plate
Lisand Spreader
Lisand Sticks

Right: The tripod itself has sharp feet which are not the best for hard wood floors and things that can get scratched.

Far Right: The Lisand Tripods have the second best head the school has. Behind the Cartoni C 20 S.

Kit Information:

Ball Size: 100mm

Height: 39" - 60"

Weight Capability: 30 lbs.

Screw Sizes: 1/4-20, 3/8-16 (Non Included)

Attachable Cameras: ZR900, PD-150, DVX100, HVX200

Number of Stages: 2

Notes, Tips & Tricks:

- Feet are very pointy and will ruin a hard wood floor. Put carpet squares or something else under them to protect your location.
- Use caution when locking the plate in place, sometimes it is difficult to fully lock.
- Screws do not attach to the plate and fall out easily, DO NOT LOSE THEM!

CAMERA SUPPORT

Losmandy Porta-Jib

**Reservable Item

PlateMate Weights
Small Male Weight Rod
Tightening Handle

Kit Information:

Ball Size: 100mm

Height: 24" - 84"

Weight Capability: 100 lbs.

Screw Sizes: See Bogen 3066 (pg.)

Attachable Cameras: All Cameras compatible with Bogen 3066 head
Bogen 510 head and Peter Lisand head.

Number of Stages: 3 (2 on legs plus jib)

Notes, Tips & Tricks:

- This can be a great tool for adding movement to your film, but you can also lose fingers to it if you don't know how to use it properly. Ask Checkout for proper instruction.
- Do not raise center column of tripod.
- Threads get stripped easily, use caution when tightening locking knobs.
- Last locking knob must be removed to properly pack the jib.
- ALWAYS balance the jib, never use it when one side is heavier than the other, because it is much more difficult to control, and thus more dangerous.

CAMERA SUPPORT

Bogen 2036 & Bogen 510

Reservable Item

Kit ID: BO1 & BO2

Kit Contents:

Head
Plate
Sticks

Bogen 3063 Manfrotto Tripod

Kit Information:

Ball Size: 75mm
Height: 33" - 59"
Weight Capability: 44 lbs.
Screw Sizes: 3/8-16
Attachable Cameras: Arriflex S/B , M, Scoopics , 150, 170, A1U, V1U, Z1U.
Number of Stages: 2

Notes, Tips & Tricks:

- Plate is six sided - not your standard film plate.
- No spreaders, make sure you sandbag every leg.

Above: The Bogen 3063 has an hexagon shaped plate. This means you shouldn't use it with any of the film cameras.

Reservable Item

Kit ID: 510

Kit Contents:

Head
Plate
Sticks
Spreader

Bogen 510 Tripod

Kit Information:

Ball Size: 100mm
Height: 35" - 59"
Weight Capability: 44 lbs.
Screw Sizes: 1/4-20, 3/8-16
Attachable Cameras: All Cameras except Arriflex SR-Series and Sony 570 and 700.
Number of Stages: 2

Notes, Tips & Tricks:

- Works with Bogen Rollers.
- Great for HVX 200.
- Attaches to the Losmandy Porta-Jib.

CAMERA SUPPORT

Miller-Cartoni Tripod

Reservable Item

Kit ID: Miller Tripod

Kit Contents:

Special thanks to the broadcast TV stations of the late 50's for 1/10 of a percent. Thanks for 29.97 and 23.98, we love those numbers.

Hard Drives

Kit IDs: HD1 - HD9

Kit Contents:

- Pelican Case
- 75GB Hard Drive
- 6 to 6 Pin Firewire
- Power Cord
- Power Adapter

Reservable Item

Above: Hard drive kits are a good stop gap if something happens to your hard drive, but they are not a permanent solution.

Hard Drive Kit

Notes, Tips & Tricks:

- Can only be checked out for 2 weeks at a time.
- Make sure that everything is turned off while plugging into power. Plug in firewire first, then turn on computer and drive.
- Approximately 80GB drives.
- Reformat drive before returning drive to checkout
- THIS IS NOT A PERMANENT SOLUTION TO STUDENT STORAGE.

Non-Reservable

Kit ID: FRB

Kit Contents:

Film Rewind Board

Rewind Board

Notes, Tips & Tricks:

- Helpful if you want to break a 400' mag into daylight spools or to change A to B wind. If you do this, you will need a room that is completely light-tight. Ask the photo department about using a

Above: The Film Rewind board is really helpful when you are trying to break a 400 foot load into daylight cores

Rewind Board & Reels

Above: This is a split reel that has been unscrewed to show how it comes apart.

Non-Reservable

Kit ID: Split Reel

Kit Contents:
Split Reel

Split Reel

Notes, Tips & Tricks:

- Use with projector or rewind board.
- Plastic cores are available at checkout and cost 25 cents.

Above: A projection reel that you put film on before you run it through the projector.

Non-Reservable

Kit ID: Projection Reel

Kit Contents:
Projection Reel

Projection Reel

Notes, Tips & Tricks:

- Use with projector or rewind board.

Tape Decks

Right: The kit for the DSR-11 comes with everything you should need to plug it into your personal computer.

Non-Reservable

Kit ID: DSR, Grad DSR

Kit Contents:

DSR-11
4 to 6 Pin Firewire
Case
Power Cord
Power Supply
Remote

Sony DSR-11 Deck

Notes, Tips & Tricks:

- Make sure that everything is turned off while plugging into power. Plug in firewire first, then turn on computer and deck.
- Use this to capture DV and DVCAM footage - NEVER a camera.
- Make sure the door stays closed when not inserting or removing a tape.
- The doors are fragile, and cost approximately \$85.

Right: The front latch should always be closed when not using the DSR-11. It stops dust from getting into the mechanism. It breaks easily is also a very expensive piece so be careful with it.

Non-Reservable

Kit ID: M15U

Kit Contents:

Sony M15U
4 to 6 Pin Firewire
Case
Power Cord
Power Supply
Remote

Sony M15U Deck

Notes, Tips & Tricks:

- Make sure that everything is turned off while plugging into power. Plug in firewire first, then turn on computer and deck.
- Use this to capture DV, DVCAM and HDV (except Canon's 24f HDV or JVC's HDV Codecs) footage, not a camera.
- Be aware of menu settings regarding format. Check out a manual or ask at Checkout if you are unsure.
- There is only one of these available; check it out only if you are capturing HDV footage.

Above: The M15U is a newer version of the DSR-11 that can handle HDV footage. Make sure that you need this deck before you take it.

GRIP

Most grip equipment is known by multiple names. A beadboard holder is also known as a duckbill, platypus, quaker and billy grip. Each set may have a different name for the same pieces of equipment. Become familiar with these terms as quickly as you can.

When returning grip equipment that may have been exposed to water, always ask Checkout for a rag and can of WD-40 to wipe it down. Wipe down entirety of equipment, especially moving parts.

Big Blue Grip Kit

Kit ID: BBGK

Below: The Super Duz All cart, or taco cart, holds almost all the grip gear you will need. You must have a U-Haul or similar enclosed trailer to use this kit.

**Non-Reservable
 Certification Req.**

Above: 18in. x 24in. Single Net, Singles are denoted by the green fabric around the edge, a single cuts down one stop of light.

Above: Bead Board Holder, makes clamping a bounce board to a C-Stand easy. This item has many different names, duckbills, platypus...

Above: The BBGK has two combo stand, one low boy combo stand (not pictured), six 40in. C-Stand and one 20in. C-Stand. The combo stand has a lollipop in it.

Big Blue Grip Kit (Cont.)

Above: Chain Vise Grip, used to clamp a small light to just about any object the chain can fit around.

Right: 4ft. x 4ft. Reflector Board, used to reflect sunlight has a hard side and a soft side, each side has a different feel to it.

Notes, Tips & Tricks:

- You must rent a U-Haul and provide Checkout with proof that you have done so two days before your scheduled pickup.
- Get a printout of all equipment in the kit (or refer to these pages) to help keep track of all parts so that nothing gets left behind.
- When not using shinies on stands, make sure they are tabled. Shinies should always be heavily sandbagged.
- Always stake down and heavily sandbag 6x6 frames. If winds are two high, disassemble and do not use. Failure to do so could result in serious damage to equipment and crew members.
- No partial check-out is allowed, everything must be taken from Checkout, even if you only plan to use part of the kit.
- Be careful not to lose Mafer Clamp adapters - they are very small.
- DO NOT cut any of the rope provided - buy your own if you need different lengths.
- When returning the Big Blue Grip Kit to Checkout, you MUST arrive when Checkout opens - this kit is very large and every item must be hand-checked, it takes at least two hours to check in.

Above: A few of the smaller parts in the BBGK.

Space Clamp

Above: All the clips and rope go in the one case, be careful with the scissor clamps, they can be bent, and if they bend too much and get broken, you have to replace them.

Above: The Space Clamp is a good tool to use to attach lights to beams and other objects that the C-Clamps aren't big enough to get around. However try not put a bunch of weight on them.

Notes, Tips & Tricks:

- Pack smaller, more delicate items (scissor clamps) on top of heavier items, not vice-versa.
- A Lowel information packet regarding items in the kit is available to look at in Checkout, unfortunately it cannot not leave building.
- DO NOT cut the ropes! If you need other lengths, buy your own. The ropes are standard lengths for a reason, and everyone needs to use them.

Left: Rope can be used for many things. Securing lights and frames outside is very important because a strong gust of wind can easily knock over a light if it has not been secured.

Red rope denotes the red grip kit.

Before checking these kits out you should learn the bowline and the truckers hitch. Both knots will be very good to know on set.

Yellow rope denotes the yellow grip kit.

Compact Grip Kit and Stand Kits

Impact C-Stand

Notes, Tips & Tricks:

- The top of the stand can be loosened and turned sideways.

Reservable Item

Kit ID: ST1

Kit Contents:

Stand

Reservable Item

Kit ID: Light Stand Gobo-Arm Kit A & B

Kit Contents:

- Gobo Arm
- Stand
- Case

Light Stand Gobo-Arm Kit

Notes, Tips & Tricks:

- The stand has a “Rocky Mountain Leg” which can be extended and retracted so that the stand remains

Matthews C-Stands

Above: Right hand rule is very important when using a C-Stand. Make sure that when you set up a C-Stand that the knuckles are to the right.

Above: C-Stands are great for holding just about anything you need on a film shoot.

Reservable Item

Kit ID: 1 - 28
Kit Contents:
C-Stand

Notes, Tips & Tricks:

- The engraved number on the C-Stand must match the number on the gobo arm when returning stands.
- All knuckles should be tightened and facing the same direction when returned to Checkout.
- Understand what the “right-hand rule” is (as demonstrated above,) if you don’t, ask.
- If C-Stands are exposed to water (condensation, rain, snow) they must be wiped down with WD-40 so that they don’t rust.

Gobo arms are the grabbing arms that come with C-Stands.

Reservable Item

Kit ID: ST1
Kit Contents:
Gobo Arm

Road Rags Kits, Small & Large

Reservable Item

Small Flag Kits

Kit ID: F1-F2

Kit Contents:

Bag
 Double Net
 Flag
 Open Frame
 Open Frame
 Silk
 Single Net

Large Flag Kits

Kit ID: F3-F6

Kit Contents:

Bag
 Double Net
 Flag
 Open Frame
 Open Frame
 Silk
 Single Net

Above: 18in. x 24in. Double Net set up on a C-Stand. This shows one of the many uses a C-Stand has on set.

Notes, Tips & Tricks:

- When breaking down frames, completely remove pole gently before folding up - they have often been broken in the past and cost at least \$75 to replace, depending on market value.
- Must be returned with all flags, silks and scrims folded neatly and tucked into their compartments.
- Can be hand-held, but otherwise require a C-Stand/Gobo Arm.

Above: A 24in. x 36in. Solid and a 18in. x 24in. Silk, this shows the difference in sizes between the small and large kits.

Below: This is what the kit should look like when it is packed up. Then you should fold the top flap down to the velcro and then fold it into thirds.

Above: The frames break easily if they are forced or not used properly. Some of the kits contain broken frames. Check the kit thoroughly when you check it out.

Flex Drop Green Screen & Fog Machine

Reservable Item

Kit ID: Flex Drop Green Screen

Kit Contents:

- Green Screen
- Green Screen Stand

Flex Drop Green Screen

Notes, Tips & Tricks:

- Can be very difficult to fold back into its case. It's probably easier to do so with two people.
- More stable with extra support, use sandbags on the base.

Far left: the greenscreen side.

Left: the bluescreen side.

Reservable Item

Kit ID: FM

Kit Contents:

- Box
- Fog Machine

Left: The fog machine is great to create a little atmosphere, throw some light through it and look at the particles.

Fog Machine

Notes, Tips & Tricks:

- Fog juice does not come with machine - sold separately at Checkout.
- Clean before returning, you will be fined otherwise.
- If your location has particle smoke-detector, this machine will set it off - BE AWARE!

Impact Bounce & Lite Disc

Reservable Item

Kit ID: IB1 - IB6, B1 - B4

Kit Contents:

Diffusion
Reflector
Case

Notes, Tips & Tricks:

- Know how to pack up disk, if you don't know, ask a Checkout worker to demonstrate.
- Diameter 3' 6"
- The bounce has effectively 5 sides: silver, gold, partial gold, partial silver and white.

Above: The Impact bounce displaying a few of its sides. There are a total of 5.

Reservable Item

Kit ID: IB7

Kit Contents:

Small Lite Disc

Notes, Tips & Tricks:

- Know how to pack up disk, if you don't know, ask a Checkout worker to demonstrate.
- This bounce is very small. It is primarily intended for macro photography. Diameter: 1' 11"

Above: LiteDisc Seven only has the diffusion or soft bounce, it is also much smaller than the other bounce disks

GRIP

Matthews Doorway Dolly

**Reservable Item
Certification Req.**

Kit ID:DK1-DK2

Kit Contents:

Base
Stationary Handle
Turning Handle
Wing
Wing

Right: The dolly with the regular wheels on, it can be used like this, but be aware that the dolly doesn't always roll straight.

Notes, Tips & Tricks:

- If pneumatic wheels are removed to put on skate wheels, do not lose metal spacers on the front wheels.
- Do not over-tighten wheels or they will not roll.
- Track must be reserved separately.

Left: Use the tie down hook to secure your tripod to the dolly. This can be done with a ratchet strap.

Kit ID: DK1-DK2

Kit Contents:

Level
Dolly Curve Track
Dolly Curve Track
Dolly Straight Track
Dolly Straight Track
Dolly Straight Track
Skate Wheels
Skate Wheels
Skate Wheels
Skate Wheels
Skate Wheels Box
Wrench

**Reservable Item
Certification Req.**

Notes, Tips & Tricks:

- ALWAYS level dolly track - not only is it important for your shot, it is also safer for equipment and crew members.
- The skate wheels are NEVER to touch the ground. If they do, they will collect dirt, and an ideally smooth dolly will feel like a trip down a gravel road. If you allow them to touch the ground on a professional set, you will be fired.
- Do not over-tighten the locking levers that connect the pieces of track together - they can break.
- You must reserve the dolly itself separately - don't reserve track without the dolly.

Microdolly

Reservable Item

Microdolly Basic Kit

Kit Information:

Weight Capability: 100 lbs.

Attachable Tripods:

Notes, Tips & Tricks:

- You must check out the travel case with this kit.
- The dolly should be pulled, not pushed.

Kit ID: Microdolly**Kit Contents:**

Cloth
Handle
Instruction Card
Leg A
Leg B
Rope Ratchet
Soft Case
Styrofoam Track Thread A
Styrofoam Track Thread B
Track
Track Bumper
Wood Shims
Wrench

Top: packed into it's case.

Middle top: the parts laid out.

Left: the dolly set up and demonstrated with a tripod. It is intended to be pulled, not pushed.

Left: Shims and other included accessories.

GRIP

Non Reservable Grip Gear

Above: Apple boxes are one of the most useful things on set, from helping to level a dolly track to being a chair for someone on set. This is an example of a “half” apple box.

Reservable Item

Kit ID: Apple Boxes

Kit Contents:

Apple Box

Apple Boxes

Notes, Tips & Tricks:

- There are basically five sizes of Apple box: Full, Half, Eighth, Quarter and Pancake. Only the height varies between sizes. A full apple box is 1’8” long, 1’ wide and 8” tall, a half apple is 4” tall, etc. Pancakes vary in thickness but are generally around 1/4” - 1/2”.

Above: Sandbags are also another very useful item. They help keep all your equipment safe. Always have a sandbag on a stand if there is a light on it. And use two of three if you have extras.

Reservable Item

Kit ID: Sandbags

Kit Contents:

Sandbag

Sandbags

Notes, Tips & Tricks:

- There is a maximum 15 bag limit per production, depending on quantity available.
- There is a proper way to stack sandbags; each bag should be placed perpendicular to the last so that they interlock.
- Full sandbags should be about 20 lbs.
- Use them properly, the zippers can break easily.
- Empty sandbags are also available. When you fill them, put the rocks or sand in a ziplock before placing them in the bag. Empty and clean such bags before returning them.

LIGHTING ACCESSORIES

Know the “West Virginia Law”: $\text{Watts} = \text{Volts} \times \text{Amps}$. Most circuits are 120 volts and 15 to 20 amps. Check the lights for wattage ratings and calculate your amp load to make sure you are not plugging too many lights into one circuit.

LIGHTING ACCESSORIES

Dimmer Kit & Power Accessories

Reservable Item

Kit ID: DIM
Kit Contents:
 1000w Dimmer
 600w Dimmer
 600w Dimmer
 Dimmer Kit Case

Right: Dimmers can be very useful to adjust lights to the intensity your shot requires.

Dimmer Kit

Notes, Tips & Tricks:

- Pay attention to wattages on the dimmers. A 650w light WILL destroy a 600w dimmer.
- Very useful for dimming practicals, china balls and accent lighting.
- Be aware - color temperature decreases when light is dimmed, lights will be more orange.

Non-Reservable

Kit ID: Power Accessories
Kit Contents:
 Single Extension Cords

Notes, Tips & Tricks:

- Reserve single extensions and other items if you don't need an entire extension cord package.

Above: A single stinger.

Above: When running many small lights, power strips are useful.

Above: 3-Way stingers usually can't handle as many amps as regular stingers.

Above: Ground Lifts and Cube taps are helpful for adapting or adding additional outlets.

LIGHTING ACCESSORIES

Extension Cord Kit

Below: Extension cord kits are a must for every shoot with some lights. Most senior films will use two of them. If one stops working please mark it and tell us.

Above: Cube tap, for splitting a socket.

Below: Ground lift for sockets without a ground wire.

Extension Cord Kit

Notes, Tips & Tricks:

- Check to make sure that the kit number on the cords and crate match when packing.
- Remove tape (that may have been used to secure cords to the floor, wall, etc.) when returning, otherwise they get sticky and difficult to wrap and unwrap.
- Coil all of the cords so that they are approximately the same size and fit neatly into the crate.
- Ground lifts are used to plug a grounded Edison plug into a non-grounded socket. Do not remove grounded ends on extension cords!

Reservable Item

Kit ID: EX1-EX9

Kit Contents:

- 3-Way Stinger
- Box
- Crate
- Cube Tap
- Cube Tap
- Ground Lift
- Ground Lift
- Ground Lift
- Ground Lift
- Ground Lift
- Power Strip
- Short Stinger
- Stinger
- Stinger
- Stinger
- Stinger
- Stinger
- Socket Tester

LIGHTING ACCESSORIES

Light Pole & Single Light Stands

Reservable Item

Kit ID: Light Pole 1-3

Kit Contents:
Light Pole

Light (Extension) Pole

Notes, Tips & Tricks:

- Extends from 2'10" to 5'2"
- Can be checked out in addition to other light kits as a supplement.

Right: Light poles are great for putting a china ball off the end of a C-Stand and extending it further out than would normally be possible with just a C-Stand arm.

Reservable Item

Kit ID: Single Light Stand 1-14

Kit Contents:
Single Light Stands

Single Light Stands

Notes, Tips & Tricks:

- Necessary for some kits, make sure you check one out with:
 - Arri Kit, Type 3 (1)
 - Arri Kit, Type 4 (1)
 - HMI Kit (1)
 - Lowel SGK (2)
 - Lowel Pro Kit (2)
 - Ambi Kit (1)
 - L-light Kit (1)
 - Single Broad Lights
 - Single Scoop Lights
- Only available if required for one of the above kits, not as a supplement to otherwise complete kits such as the Arri Lighting Kits or Mole Combo Kits.

Above: Extra light stands are great to have around, and some lighting kits don't come with stands or with enough stands for every light in it. Make sure you know how many you need.

LIGHTING KITS

If a lamp burns out, bring it back to checkout. You will not be charged for the lamp if you bring it back; you will be charged if you do not.

Use gloves to replace the blown lamp with the correct spare lamp from the kit. Oil from your bare fingers can cause the lamp to overheat and explode.

Make sure lights are turned off before plugging them in.

Know the “West Virginia Law”: $\text{Watts} = \text{Volts} \times \text{Amps}$. Most circuits are 120 volts and 15 to 20 amps. Check the lights for wattage ratings and calculate your amp load to make sure you are not plugging too many lights into one circuit.

When using a dimmer, the color temperature will get increasingly warmer as the light is dimmed.

Allow lights to completely cool before packing them back into their kits.

LIGHTING KITS

Arri Kit (Type 1)

Broad & Scoop Lights

Reservable Item

Kit ID: Broad 1-5

Kit Contents:
Broad Light

Broad Lights

Kit Information:

Number of Lights: 1

Wattages and Codes: 1000w(FHM)

Max Wattage of Kit: 1000w

Number of Light Stands: 0

Color Balance: Tungsten (3200K)

Notes, Tips & Tricks:

- Does not come with a stand, you must request one.
- Throws light in one direction, very general.
- Barn doors can fall off easily, make sure you don't lose them.

Below: The broad is a good source of general lighting, but it's not the easiest light to control.

Reservable Item

Kit ID: Scoop 1-2

Kit Contents:
Scoop Light

Scoop Lights

Kit Information:

Number of Lights: 1

Wattages and Codes: 1000w(FEL)

Max Wattage of Kit: 1000w

Number of Light Stands: 0

Color Balance: Tungsten (3200K)

Notes, Tips & Tricks:

- Does not come with a stand, you must request one.
- Throws light in one direction, very general.

Above: The scoop is similar to the broad in that it is good for general lighting. The shape of the light source is the main difference between the two.

LIGHTING KITS

C-Clamp Tota Kit

Reservable Item

Kit ID: CT1-CT2

Kit Contents:

Crate
Light
Light
Light

Left: All three lights with their barn doors open. These lights get hotter than any other light checkout has. Make sure you wear leather gloves when you touch them or you will burn yourself.

Above: All three lights fit nicely into their crate with their barn door shut. Make sure they're cool before you put them away!

Kit Information:

Number of Lights: 3
Wattages and Codes: 1000w(FHM) x 3
Max Wattage of Kit: 3000w
Number of Light Stands: 0
Color Balance: Tungsten (3200K)

Notes, Tips & Tricks:

- VERY HOT & BRIGHT!
- Attach to a pipe or the thick part of a C-stand, don't try to clamp them to the knuckle.
- Making a snoot out of black wrap will give greater control over light.
- Hot enough to melt gels. Do not attach gels directly to barn doors. Use a snoot and attach gel at least 3" from the fixture.

Stand
Stand
Umbrella
Dimmer
Grip Clip
Case

Above: one of the lights with a softbox attached.

Kit Information:

Number of Lights: 3
Wattages and Codes: 2 x 250w(FOS), 150w(EKB)
Max Wattage of Kit: 650w
Number of Light Stands: 1
Color Balance: Tungsten (3200K)

Notes, Tips & Tricks:

- The Cool Lux lights do not heat up as much as other lights. This can be useful when shooting extended interviews or other situations when subjects might be likely to sweat under hotter lights.
- Screw caps are plastic and will melt against the lights if left too close to them for too long.
- Light mount must be manually attached before each use.
- The 150w light has just a DC plug adapter. It can't be powered through wall outlets.

Above: the kit packed correctly.

LIGHTING KITS

HMI Kit

Reservable Item

Kit ID: HMI1 & HMI2

Kit Contents:

Power Cord
Accessory Case
Ballast
Barn Doors
Battery Belt
Chimera Ring
Chimera Softbox
Extra Bulb
Lenses
Light
Pelican Case
Power Cord
Light Stand

Kit Information:

Number of Lights: 1
Wattages and Codes: 200w(MSR 200 HR)
Max Wattage of Kit: 200w
Number of Light Stands: 1
Color Balance: Daylight (5600K)

Notes, Tips & Tricks:

- Needs light stand.
- Do NOT charge the battery through the ballast; the power cable is in the battery pack.
- These lights are Daylight (5600K) balanced, not Tungsten.

Above: accessories, including lenses, power cords, ballast, spare lamps, battery belt, chimera case, barn doors and chimera adapter ring.

Above: battery belt. Should not be plugged into wall outlet while it is being used to power light.
Left: The kit packed correctly.

LIGHTING KITS

Kino-Flo Kits

Reservable Item

Daylight Kinos

Kit ID: K1-K3**Kit Contents:**

Ballast
Bank Shell
Box
Egg Crate
Power Cord
Twist-On Mount

Tungsten Kinos

Kit ID: K4-K6**Kit Contents:**

Ballast
Bank Shell
Box
Egg Crate
Power Cord
Twist-On Mount

Right: The Kino is a great light for small spaces because it doesn't get hot. Daylight Kino tubes have blue ends.

**Kit Information:**

Number of Lights: 4

Wattages and Codes: 45w(Daylight Kino) x 4

Max Wattage of Kit: 180w

Number of Light Stands: 0 (Use C-Stands)

Color Balance: Daylight (5600K) and Tungsten (3200K)

Notes, Tips & Tricks:

- Good, soft light - excellent in many situations.
- Tubes can be detached from shell and placed separately.
- Needs to be attached to a Matthews C-stand.
- The egg crates for the front of the light are very fragile.
- Use attached "hair-tie" cable ties to take the stress off of the cords.
- Turn lights off when switching between 2ft. and 4ft. throw.
- If you remove the tubes, make sure you replace them and connect them correctly (plug in ends are color-coded.)
- Cases are breaking and unreliable - SUPPORT THE BOTTOM WHEN CARRYING!

Right: The ends of Daylight Kino tubes are blue, and the ends of Tungsten tubes are orange. They can be mixed and matched between fixtures, but make sure they are returned to their proper kits.

Above: The back of the Kino ballast has a switch so you can turn on an off each individual tube. It also has a lamp strength switch.

Above: The back of the Kino bank shell has a spot for a twist on mount and little things that look like hair ties. Run the cables for the kind through them to ease the strain on the cables.

LIGHTING KITS

Lowel Caselight

Reservable Item

Kit ID: Caselight

Kit Contents:

- Barn Doors
- Barn Doors
- Plastic Grid and Board
- Hard Case, Bottom
- Hard Case, Top with Lights
- Metal Arm
- Metal Plate Stand Clamp
- Power Cord
- Stand

Kit Information:

- Number of Lights:* 1
- Wattages and Codes:* 3 x 55w Fluorescent
- Max Wattage of Kit:* 165w
- Number of Light Stands:* 1
- Color Balance:* Daylight (5600K)

Notes, Tips & Tricks:

- Be careful when opening, the case has a latch on both sides. There are no hinges, you must detach each latch and then lift the top straight off.
- Daylight (5600K) balanced.
- SUPPORT THE WEIGHT OF THE KIT WHEN CARRYING, the latches have been broken before and are not very reliable.

Left: The kit packed correctly.

Below Left: accessories, including stand, metal arm, barn-door, back attachment, power cord and egg-crate.

Red Cooler

Above: Coolers are intended for use by craft services.

SOUND ACCESSORIES

SOUND ACCESSORIES

Boom Baskets & Boom Poles

Reservable Item

Kit IDs: BB1 - BB7

Kit Contents:
Boom Basket

Notes, Tips & Tricks:

- Used to attach hand-held microphones to a boom pole.
- Also, can be adapted to attach boom basket onto a floor or desk microphone stand.
- Check to see if you actually need this. Most shotgun microphone kits come with a shock mount/boom basket included.

Above: Boom baskets are nice to have if you want to put a mic on a boom pole that would not normally fit.

Below: Boom poles come in different sizes, evaluate your script and see what you need. Boom pole #11 (top in the photo) is really long.

Reservable Item

Kit IDs: BP1 - BP12

BP1 & BP2

WBP1 & WBP2

Kit Contents:

Boom Poles

Notes, Tips & Tricks:

- Some have internal cables.
- They come in varying sizes. if you know what kind of space you will be shooting in, ask at Checkout for an appropriate boom and they will attempt to accommodate you.
- Do not pull cord on wired boom poles. If it does not close all the way, open and close it starting at the bottom.
- Do not close the boom all the way, leave about an inch between segments.

SOUND ACCESSORIES

Microphone Stands

Non-Reservable

Kit IDs: DS1 - DS5

Kit Contents:
Desk Mic Stands

Left: Desk Microphone stand. Great for doing some ADR off a table.

Non-Reservable

Kit IDs: FS1-FS3, FS5-FS6

Kit Contents:
•Floor Mic Stands

Notes, Tips & Tricks:

- You may want to check out a sandbag with the floor microphone stand, depending on which microphone you are using.

Above: The floor microphone stand is great for doing ADR and other things when you don't have a table for a desk microphone stand.

Boom Basket to Mic Stand Adapter

Notes, Tips & Tricks:

- You can use this to attach a microphone that is held by a boom basket or shock mount to a microphone stand.

Mic Pop Filter & Parabolic Mic Holder

Reservable Item

Kit ID: Mic Pop Filter
Kit Contents:
Pop Filter

Notes, Tips & Tricks:

- Used to reduce applosives (“p” sounds) and other breath noises when recording voices.

Above: The microphone pop filter is great for stopping unwanted breath noise.

Reservable Item

Kit ID: PR
Kit Contents:
Parabolic Reflector
Case

Notes, Tips & Tricks:

- Used to capture sounds at a great distance.
- Very directional.
- You must reserve a (cardioid) microphone separately.
- Has a 3/8-16 mount on the bottom so it can be attached to a tripod.

Above: The Parabolic reflector is great for spotting events and doc shoots when you are unable to get close to the action of whatever is going on.

SOUND ACCESSORIES

Headphones

Above: These headphones are good for general listening to something on the computer.

Reservable Item

Kit IDs: 1 - 10

Kit Contents:
Sennheiser HD-201

Notes, Tips & Tricks:

- Do not use for accurate sound mixing, but good for general editing.
- When wrapping cables to return, do not wrap the cord around the headphones. Cord should return wrapped in the method demonstrated in the photo.

Above: These headphones are great all around and are better than the Sennheiser's for mixing audio on the computers in the NLE.

Reservable Item

Kit IDs: 1 - 15

Kit Contents:
Sony MDR-7506
Bag

Notes, Tips & Tricks:

- Flat response, great for mixing.
- When wrapping cables to return, do not wrap the cord around the headphones, just dangle the cord into the bag and put the headphones on top of it.
- Make sure the bag number matches the headphone number.

Stereo Array Bar

Reservable Item

Kit IDs: 1-6

Kit Contents:
Stereo Array Bar

Notes, Tips & Tricks:

- Used to record SFX in a stereo array.
- You need a microphone stand or a boom pole with an adapter to set up.
- All sound effects should be recorded in stereo.

Above: Use these and two microphones to record sound effects in stereo.

SOUND MICROPHONES

“Dynamic” means that the microphone requires no additional power.

“Condenser” means that the microphone requires power (Phantom or Battery) and is slightly more fragile.

Having a “cardioid” pickup pattern means that a microphone picks up more sound information in front of it than behind it or beside it.

Having a “super (or hyper) cardioid” pattern means that a microphone is more directional and picks up much more information in front of it than behind it or beside it. “Shotgun” or “boom” microphones are super cardioid.

Having an “omni” pickup pattern means that the microphone will pick up sound fairly equally in all directions.

DO NOT use a battery when a microphone is already connected to phantom power.

A super/hyper cardioid pickup pattern. (Shotgun)

An omni-directional pickup pattern

A cardioid pickup pattern.

Wireless LAV Kit

Reservable Item

Kit ID: WL1 - WL3

Kit Contents:

Omni Lav Microphone
Wireless Transmitter
Wireless Receiver
Wireless Antenna
Wireless Antenna
Receiver Case
Case

Left: the receiver,
transmitter and
lavaliere microphone.

Kit Information:

Wireless Lav: Audio-Technica
MT830c, Sennheiser G3's.

Notes, Tips & Tricks:

- Range is short, approximately 20 meters for the AT, and 100+meters for the Sennheisers.

Above: Sennheiser Kit

SOUND MICROPHONES

Super Cardioid/Wired Lav Kit

Reservable Item

Kit ID: SM1-SM8

Kit Contents:

CK91 Microphone
Power Cable
Pistol Grip
Rycote Zeppelin
Omni Lav Microphone
Power Supply
Windscreen
XLR Cable
XLR Splitter

Above: the shotgun and lavalier microphones.

Above: shotgun microphone accessories including shock-mount, blimp, windscreen, brush, XLR splitter and XLR cable.

Kit Information:

Shotgun Microphone: AKG CK 98-AT 835b- Sennheiser ME 66- Sennheiser ME 80.
Wired Lav: Audio-Technica MT830c, Sennheiser 102, Sony.

Notes, Tips & Tricks:

- These mics will be the power horses for most location recording.
- The wired lavs are most useful for shooting interviews. They are more reliable than wireless lavs.

The Shotgun Kits also come with AT 835b, Sennheiser ME 66, and Sennheiser ME 80.

SOUND MICROPHONES

Super-Cardioid

Reservable Item

Sennheiser 816

Notes, Tips & Tricks:

- Super-Cardioid Condenser Microphone
- Very directional, good for noisy locations.
- Must use phantom power.

Above: The 816 with its Rycote set up.

Above: The 816 with the Rycote open so you can see the microphone.

Kit IDs: 816

Kit Contents:

- Brush
- Case
- 816 Microphone
- Rycote Modular Windshield System
- Short XLR Cable
- Windjammer

Reservable Item

Kit IDs: ME-67

Kit Contents:

- Case
- MZH 70-1 Windscreen
- MZS 20-1 Shock Mount
- Microphone

Sennheiser ME-67

Notes, Tips & Tricks:

- Lobar (Hypercardioid) Condenser Microphone
- Very directional, good for noisy locations.

Above: The ME-67, pictured here without its windscreen, is our second longest shotgun.

SOUND MICROPHONES

Cardioid/Wired Lav Kit

Reservable Item

Kit IDs: CM1-CM2

Kit Contents:

CK91?Numann KM-150
Case
Power Supply (for KM-150)
Shock Mount
Wind Sock
Zeplin
Long XLR
XLR Splitter
Wired Lav

Cardioid/Wired Lav Kit

Notes, Tips & Tricks:

- Variable Condenser Microphone
 - Short shotgun - has a large pickup pattern than most shotguns (less directional.)
 - Good for quiet, indoor locations.
- These two mics are some of the highest quality in our arsenal. Especially the Neumann KM-150. They are more difficult to use, as they will pick up any unwanted noise, but if the conditions are right they will prove the best option.
- They are also a good option for foley work.

SOUND MICROPHONES

Sound Kit

Reservable Item

Kit ID: S1 - S8

Kit Contents:

- Shotgun Capsule
- Shotgun Power
- Rycote Softie
- Boom Basket
- Boom Pole

SOUND MICROPHONES

Stereo Mic Kit

Reservable Item

Kit ID: SM-1

Kit Contents:

CK 91: Microphone Capsule
CK 91: Microphone Capsule
Microphone Power A91 Joint
Microphone Power A91 Joint
CK 94: Figure-8 Capsule
Rycote Zeppelin
Rycote Softie
XLR Cable
XLR Cable
Pelican Case
Stereo Array Bar

Above: the microphones, joints and power sources.

Kit Information:

Microphones: AKG CK 98, 2x AKG CK 91.

Notes, Tips & Tricks:

- The CK 94: Figure 8 capsule is perfect for two-person interviews or scenes. The pattern allows you to put the microphone between the two, and keep it there. But make sure you are on the correct axis.
- The stereo mic set (2x CK 91 capsules) is great for ambient sounds or foley. The blimp isn't quite as useful as the stereo bar (not pictured), but is good when a microphone stand isn't easily available.
- The best way to create a stereo pair is to get the microphones as close as possible by tilting them 45 degrees toward each other. A good example is the stereo array on the Zoom recorder.

Above: accessories, including shock mount, blimp, windscreen, foam heads and XLR cables.

Portabrace Case
Pelican Case

Kit Information:

Format: DAT Tape

Notes, Tips & Tricks:

-

Above: a view of the the top of the recorder and its controls.

Above: accessories, including power cord, power adapter, battery charger, batteries and XLR adapters.

SOUND RECORDERS & MIXERS

Mackie Mixer & MM-3100

Above: The Mackie Mixer is good for a shoot in a studio.

Reservable Item

Kit IDs: 1-2
Kit Contents:
Mackie Mixer

Mackie Mixer 1202-VLR

Kit Information:

Mixer or Recorder: Mixer
Channels In: 8
Channels Out: 1(2)

Notes, Tips & Tricks:

- Great for studio mixing, not so great on location because it is so big. Good for situations with multiple microphones.

Below: If you need to mix three channels down to one this is what you should use.

Reservable Item

Kit IDs: FM1
Kit Contents:
Case
MM-3100

Field Mixer

Kit Information:

Mixer or Recorder: Mixer
Channels In: 3
Channels Out: 2

Notes, Tips & Tricks:

- Good for on location multiple microphone setups.
- Caution: once tracks are mixed down, they can't be separated later.

SOUND RECORDERS & MIXERS

Nagra 3 & Sony Cassette Recorder

Reservable Item

Kit IDs: Nagra

Kit Contents:

Nagra 3
Case
Power Supply
Counter

Nagra 3

Kit Information:

Mixer or Recorder: Recorder

Channels In: 2

Notes, Tips & Tricks:

- Uses 1/4" Magnetic tape - an analog recorder, not digital.
- Requires 9 D-cell batteries.
- Very heavy.

SOUND RECORDERS & MIXERS

Sound Devices 302

Above: Take advantage of this mixer's preamps (better quality than the cameras) and full meter L.E.D.

Above: The 302 has two out puts, great for running into a camera.

Above: The 302 has three inputs so you can mix down to two.

Reservable Item

Kit IDs: SDM 1 - SDM 3

Kit Contents:

Sound Devices 302
1/4in. to 1/8in. Adapter
Case

Kit Information:

Mixer or Recorder: Mixer

Channels In: 3 XLR-in

Channels Out: 2 XLR-out

Notes, Tips & Tricks:

- Can go between a digital camera and microphone so that the recorded camera sound is already in sync and of higher quality.
- Make sure small switches are set appropriately for your recording purpose. (Consult manual.)
- Takes three AA batteries.
- Checking out a manual is recommended. Theo Lipfert is also a good source of information.
- The pre-amps in the SD 302 are MUCH nicer than those in the 702 or 722. You get a better recording if you mix into the 302, and then record into the 702 via a line input.

SOUND RECORDERS & MIXERS

Sound Devices 722 & 702

Reservable Item

Kit IDs: HDR 1 - HDR 6

Kit Contents:

1/8in. to 1/4in. Adapter
Body
CF Card
CF Case
CF Reader
Case
Power Supply
TA3-F to XLR-M
TA3-F to XLR-M
USB 2.0 Cable

Right: The hard disc has two inputs.

Far Right: The case for the 722 is very well padded and holds the recorder in place well, please keep it in the case as much as possible.

Kit Information:

Mixer or Recorder: Recorder

Channels In: 2

Notes, Tips & Tricks:

- Records to a device-internal hard drive and then transfers via 6-pin firewire to a computer, or, preferably, via enclosed compact flash reader.
 - Use the compact flash reader to transfer data - the firewire ports are continually being damaged by attachment in an incorrect order.
 - 722 Can record to both hard drive and compact flash simultaneously.
 - If connecting to computer with firewire, make sure all power is off when connecting firewire, then turn on computer and recorder.
 - Will take any Sony L-Series battery.
- We have both the SD 722 and 702. Functionally these two recorders are exactly the same, except that the 722 also allows the used to record to an 80GB internal Hard Drive. This is extremely good for back-up!

Right: accessories, including power cord, C-link cable, USB cable, CF reader, 1/8" - 1/4" adapter and XLR - XL-2 adapters.

Zoom H₄N

Reservable Item

Kit IDs: Zoom1-Zoom6

Kit Contents

Zoom Recorder
SD card
SD card case
Green Zoom case
Hand Hold handle
Instruction Manual
Power Supply
Card Reader
Card Reader USB cable

Above: The Zoom H4N has a stereo pair microphones, which are perfect for ambiance recording.

Below: The Zoom also has two XLR inputs... although gain cannot be controlled separately!

Kit Information:

Mixer or Recorder: Recorder
Channels In: 2

Notes, Tips, & Tricks:

- Records four tracks to an SD card.
- Offers the option to record to two XLR inputs and or a stereo pair attached to the top.
- The gain for the XLR inputs cannot be controlled separately!
- Every time a the SD card is cleaned, the files are renamed, which means that several files have the same name. It is best to batch change the file names each time the card is dumped.
- Do no attempt to use phantom power, it will kill your batteries immediately!
